

DR. VIJAY PARBATANI

Consultant - Ophthalmology

Qualification

MBBS | Diploma in Ophthalmic Medicine & Surgery (DOMS) | MS Ophthalmology

Overview

Dr. Vijay Parbatani is a distinguished eye specialist based in Baner Pune, renowned for his clinical expertise, surgical precision, and compassionate patient care. With over a decade of experience in the field of Ophthalmology, Dr. Parbatani has built a strong reputation as a trusted consultant and surgeon, particularly in the areas of cataract surgery, LASIK vision correction, and retinal care. He holds an MBBS, a Diploma in Ophthalmic Medicine and Surgery (DOMS), and a Master's degree (MS) in Ophthalmology. These qualifications, combined with continuous hands-on training and international exposure, form the foundation of his well-rounded medical practice. His specialization includes cataract surgeries using advanced phacoemulsification techniques, refractive procedures such as LASIK and Femto LASIK, and treatments for retinal disorders including diabetic retinopathy. Dr. Parbatani's commitment to excellence is reflected in his extensive training and fellowships. He has completed a two-year advanced phacoemulsification program and has pursued a medical retina fellowship to deepen his expertise in managing complex retinal conditions. His international experience includes a cornea observership

at the Royal Victorian Eye and Ear Hospital in Melbourne, Australia, and a femto cataract fellowship from the Singapore National Eye Centre (SNEC). Additionally, he has undertaken Orthokeratology training in Mumbai and several LASIK training courses to stay abreast of evolving technologies in vision correction. He is a board-certified ophthalmologist and an active member of several professional organizations, including the All India Ophthalmological Society and the Pune Ophthalmological Society. His clinical research and academic contributions have been recognized through publications in both national and international peer-reviewed journals. He also contributes to the medical community by training fellow ophthalmologists, particularly in the field of cataract surgery under the Indian Medical Association (IMA) initiatives.
