

DR. SRAVANI ATCHUTA KOTAMSETTI

Specialist - Paediatrics

Qualification

MBBS | DNB Paediatrics

Overview

Dr. Sravani Atchuta Kotamsetti is a dedicated paediatrician in Brookefield, bringing 3+ years of experience across multi-speciality tertiary centres and government medical institutions. She is currently practising as a Specialist - Paediatrics at Manipal Clinic Brookefield, where she provides comprehensive, evidence-based outpatient consultations and preventative child healthcare. Known for her gentle bedside manner, clinical precision, and family-centred approach, Dr. Sravani is considered by families and peers as one of the best paediatricians in Brookefield, Bangalore. Dr. Sravani completed her MBBS from Rajiv Gandhi Institute of Medical Sciences (RIMS), Ongole, Andhra Pradesh, in 2018. Following her compulsory rotatory internship and clinical roles, she pursued specialised postgraduate paediatric training, earning her DNB in Paediatrics from the Kokilaben Dhirubhai Ambani Hospital and Medical Research Institute, Mumbai (2020–2023). She has also completed specialised modules including Paediatric Epilepsy Training (PET-1) organised by the British Paediatric Neurology Association (BPNA), alongside Advanced Neonatal Resuscitation Program (NRP) and Paediatric Advanced Life Support (PALS) training.

At Manipal Clinic Brookefield, Dr. Sravani provides comprehensive outpatient clinical assessments and preventative care for newborns, infants, children, and adolescents. As a child specialist in Brookefield, Bangalore, her clinical scope encompasses general paediatrics, common newborn problems, infant nutrition, and the early identification of developmental delays through structured growth and developmental assessments. Dr. Sravani manages routine and complex paediatric infections, acute and chronic childhood illnesses, childhood fevers, asthma, and nutritional deficiencies. Her preventative care practice features complete paediatric and adolescent vaccination planning and counselling, along with health guidance for school children and teenagers. Active in academic paediatrics and clinical research, Dr. Sravani conducted her postgraduate dissertation on “A Study of the Incidence and Occurrence of Endocrine Disorders in Children Attending a Tertiary Care Epilepsy Clinic”, which she presented as a scientific poster at the Indian Society for Paediatric and Adolescent Endocrinology Conference (ISPAE 2023). She also presented a poster on “Peg-asparaginase-induced Hypoglycemia” at PHOCON 2022 and attended the advanced postgraduate CME at Bai Jerbai Wadia Hospital for Children, Mumbai. She engages in community healthcare education, including delivering educational talks on menstrual health and hygiene for school students. Fluent in English, Hindi, and Telugu, Dr. Sravani ensures clear, compassionate, and transparent communication with parents, guiding families through every stage of their child’s physical, developmental, and emotional health.
