

DR. AMIT GUPTA

Consultant - Cardiology

Qualification

MBBS | MD (Internal Medicine) | DNB (Cardiology)

Overview

Dr. Amit Gupta has been working in the field of Cardiology since 2006. He has a rich experience of 14 years and has performed more than 10000 procedures in the field of Interventional Cardiology, 3000 angioplasties, 250 device implantations, and 150 structural cardiac interventions. He is an invited faculty for multiple national and international cardiology summits and conferences and has presented multiple complex cases at national and international forums. Dr. Amit is committed to offering optimum care to his patients and is always at the forefront of introducing new initiatives, technology and approaches that can ease up the lives of patients in any manner. Dr. Amit is currently associated with Manipal Hospitals as a consultant with the cardiology department. For his hard work and dedication, he is regarded as the top heart specialist in Delhi. Dr. Gupta has collaborated with multiple media houses and shared articles on various occasions. He authored an article on ‘Fainting can be a sign of heart disease. Know symptoms, prevention tips, and early management for India TV News on World Hypertension Day. He was also featured in HT Healthshots for an article titled ‘5 lifestyle changes you can’t ignore

after suffering a heart attack' on World Heart Day. Post this, he shared his thoughts and information on 'Cholesterol can lead to heart blockage: Doctor shares early prevention tips' for The Times of India (Digital) on World Heart Day. Dr. Amit abides by the mottos of Manipal Hospitals that drive and inspire us every day: clinical excellence, patient centricity, and ethical practices. All this is reflected in his conduct and interaction with the patients. Dr. Gupta maintains confidentiality with patients' data at all times and his pragmatic approach towards treatment focuses on holistic healing. All this makes him one of the leading and most trusted heart specialist in Delhi. Dr Amit is fluent in Hindi and English and has treated patients from diverse cultural, and geographical backgrounds.
