

DR. K HIMABINDU

Consultant - Fetal Medicine

Qualification

MBBS | DGO | Fellowship in Fetal Medicine

Overview

Dr. K Himabindu is an obstetrician and gynaecologist, well-known in the medical field for her expertise in fetal medicine, pregnancy issues, and other gynaecological disorders. With medical degrees like MBBS and DGO in Gynaecology and Obstetrics and a fellowship in fetal medicine, she has gathered around 15 years of experience.
Dr. Himabindu is a Consultant - Fetal Medicine at the Manipal Hospital, Whitefield, Bangalore. She is an expert in performing various fetal scans during pregnancy, such as anomaly scans, where she checks the baby's general anatomy, development, and any oddities the baby might have. She has completed her MBBS from the Dayanand Medical College and Hospital Ludhiana, Punjab. Since she always wanted to be an Obstetrician, she pursued the degree of DGO (Diploma in Gynaecology and Obstetrics) from the Devaraj URS Medical College Kolar. She completed her diploma in 2011 and associated herself with medical institutions to get into the mainstream she has always been passionate about. She is an esteemed member of the Karnataka Medical Council. She also has a membership at the International Society of Ultrasound in Obstetrics and Gynaecology (ISUOG) - an

association of expert doctors in gynaecology and obstetrics that tries to spread the latest knowledge related to gynaecology and ultrasound to doctors worldwide. Dr. K Himabindu is the foremost fetal medicine specialist in Bangalore. Dr. Himabindu has completed certification courses, like Nuchal Translucency Scan (NT), Ductus Venous Doppler, and Tricuspid Doppler, recognised by the Fetal Medicine Foundation located in the United Kingdom. She is also certified to perform other scans like Cervical Assessment Scans and Uterine Artery Doppler by the Fetal Medicine Foundation. She is highly skilled in performing various invasive procedures, such as fetal blood transfusions, amniocentesis, amnio drainages, fetal reduction and fetoscopic LASER procedures, chorionic villus sampling, and many more. She is a Fetal Medicine Foundation-certified Obstetrician in invasive procedures and anomaly scans. Dr. Himabindu is an expert in pre and post-delivery care, gynaecological endoscopy, gynaecological laparoscopy, and related procedures. She counsels patients about complex pregnancies, abortion, medical termination of pregnancy (MTP), etc. She is precise in performing growth scans, quad screens, Nuchal Translucency scans, etc. She was invited to a CME (Continuing Medical Education) conference on 'Second-trimester biochemical screening and NIPT' held by BSOG in 2017. She attended another CME conference on 'Fetal Ultrasound Programme on First-trimester Scanning' in 2015. At a conference held by the International Society of Ultrasound in Obstetrics and Gynaecology in 2016, she presented her paper on 'The Outcome of antenatally detected corpus callosal agenesis/dysgenesis.' Dr. K Himabindu's accurate diagnosis and attention to detail have made her a prevalent professional.

Fellowship & Membership

- Member of International Society of Ultrasound in Obstetrics and Gynaecology(ISUOG)

Field of Expertise

- Fetal Scans
- Invasive Procedures

Languages Spoken

- Kannada
- Hindi
