

DR. SOMNATH GHOSH

Consultant - Ophthalmology

Qualification

MBBS (1985) | D.O (1990)

Overview

Dr. Somnath Ghosh is a renowned ophthalmologist based in Kolkata, India, with a distinguished career spanning over 37 years. Known for his exceptional skill, experience, and dedication, he is currently associated with Manipal Hospital Broadway. Dr. Ghosh is highly regarded for his proficiency across multiple areas in ophthalmology, including microsurgery, phacoemulsification surgery, glaucoma management, medical retina care, neuro-ophthalmology, diabetic retinopathy, and LASIK surgery. His expertise and compassionate approach have established him as one of the top ophthalmologists in Kolkata. One of Dr. Ghosh’s significant areas of specialisation is microsurgery, a highly skilled and delicate field that requires precision and attention to detail. Microsurgery has applications in ophthalmology, especially for procedures involving small structures within the eye, and Dr. Ghosh’s expertise here has brought comfort and improved vision to countless patients. His experience in phacoemulsification surgery, a minimally invasive procedure commonly used in cataract surgery, further illustrates his commitment to advancing sight restoration techniques. This procedure has

dramatically improved the lives of cataract patients, as it involves minimal incision, swift recovery, and remarkable improvement in vision quality. Dr. Ghosh, as the best Ophthalmologist in Broadway is also known for his work in glaucoma management. Glaucoma is a progressive disease that, if untreated, can lead to permanent vision loss due to damage to the optic nerve. With his extensive experience, Dr. Ghosh provides comprehensive diagnostic and treatment plans to manage glaucoma, helping to slow the disease's progression and preserve patients' sight. Additionally, Dr. Ghosh’s skill in medical retina care addresses various retinal disorders that can impair vision, including age-related macular degeneration and diabetic retinopathy. His proficiency in neuro-ophthalmology underscores his ability to handle complex cases involving the connection between the brain and the visual system. Neuroophthalmology is a challenging field that requires an in-depth understanding of both neurology and ophthalmology. Dr. Ghosh's dedication to this speciality allows him to diagnose and treat conditions where visual symptoms are linked to neurological disorders, making him invaluable to patients experiencing issues at this intersection of vision and brain function. One of the significant health challenges today is diabetic retinopathy, a condition affecting people with diabetes that can lead to blindness if not managed properly. Dr. Ghosh’s focus on diabetic retinopathy reflects his commitment to supporting a rapidly growing population with diabetes. Through early diagnosis and advanced treatment options, he works to reduce the risk of blindness among diabetic patients. Finally, Dr. Ghosh’s expertise in LASIK surgery allows him to offer patients a convenient and effective solution for vision correction. LASIK is a popular procedure that reduces the dependency on glasses or contact lenses, and his skill in this area has helped many individuals achieve clearer vision and improved quality of life. In sum, Dr. Somnath Ghosh's career and expertise have profoundly impacted the field of ophthalmology in Kolkata and beyond. His extensive knowledge, commitment to his patients, and continual advancement in surgical

and medical treatments have earned him the trust and respect of both his peers and the community. With 37 years of dedication to eye care and vision restoration, Dr. Ghosh continues to be a beacon of hope for individuals with complex eye conditions, significantly enhancing the quality of life for his patients.
