

DR. PRITISMITA KHUNTIA

Associate Consultant - Nephrology

Qualification

MBBS | MD Medicine | DrNB Nephrology

Overview

Dr. Pritismita Khuntia is a qualified medical professional with MBBS, MD in General Medicine, and DNB in Nephrology, with a strong clinical foundation and specialized expertise in the diagnosis and management of kidney-related disorders. Her practice is centered on delivering comprehensive, evidence-based, and patient-focused care for individuals with acute and chronic medical conditions, with a special emphasis on renal diseases. She has in-depth expertise in managing chronic kidney disease (CKD), acute kidney injury (AKI), glomerular diseases, electrolyte and acid-base disorders, and hypertension and diabetes related renal complications. She is actively involved in dialysis care with a focus on individualized treatment planning and improving long-term patient outcomes. Her clinical practice also includes pre-dialysis counseling, complication management, and optimization of renal replacement therapy. In addition, she has a keen interest in interventional nephrology, with hands-on involvement in vascular access management, including arteriovenous (AV) fistula assessment and support, dialysis catheter insertion and care, and ultrasound-guided renal biopsy. She also participates in the comprehensive care of

renal transplant patients, including pre-transplant evaluation, post-transplant follow-up, and long-term graft monitoring. Her approach to medicine is rooted in compassion, precision, and continuous learning. She believes in combining strong clinical skills with timely intervention and preventive strategies to reduce disease progression and improve quality of life. She is committed to maintaining high standards of patient care while continuously updating her knowledge and skills in the evolving field of Nephrology.

Field of Expertise

- Experienced in treating chronic kidney disease
- Acute kidney injury
- Glomerular disorders
- Skilled in dialysis management
- Renal transplantation
- Expertise in creating and maintaining vascular access
