

DR. DARSHINI PRIYA M

Consultant – Orthodontics - Dental Medicine

Qualification

MDS

Overview

Dr. Darshini Priya M is a highly skilled orthodontist and dentofacial orthopaedist in Bangalore specialising in digital 3D orthodontic workflows, airway-focused orthodontics, clear aligners, and skeletal anchorage systems. Practising as a Consultant – Orthodontist at Manipal Clinic, Indiranagar, Bangalore, she brings advanced expertise in non-surgical maxillary expansion, dental sleep medicine, and orthognathic treatment planning. Combining advanced clinical training with a passion for research and innovation, she delivers personalised treatment plans that improve both dental function and facial aesthetics. Her expertise in digital workflows and evidence-based orthodontics has positioned her among the emerging best orthodontists in Bangalore. Dr. Darshini completed her Bachelor of Dental Surgery (BDS) from Dayananda Sagar College of Dental Sciences before pursuing her MDS in Orthodontics and Dentofacial Orthopaedics from D.A. Pandu Memorial R.V. Dental College, Bengaluru. Throughout her postgraduate training, she developed expertise in advanced orthodontic techniques, including surgical orthodontics, skeletal anchorage systems (TADs), airway-focused

orthodontics, self-ligating appliance systems, and clear aligner therapy. At Manipal Clinic Indiranagar, Dr. Darshini Priya M manages a comprehensive clinical suite tailored for pediatric and adult structural corrections. Her specialised interdisciplinary scope encompasses MARPE/MSE expansion protocols, airway-centred orthodontics, and dental sleep medicine applications for complex craniofacial conditions. She possesses high-precision skill in executing surgical orthodontics, temporary anchorage device (TAD) placements for absolute anchorage control, Damon self-ligating fixed appliance mechanotherapy, and custom clear aligner planning. Dr. Darshini's clinical interests include airway-focused orthodontics, dental sleep medicine, orthognathic treatment planning, maxillary expansion, skeletal anchorage, clear aligner therapy, orthodontic biomechanics, and interdisciplinary orthodontic care. She also integrates digital technologies such as intraoral scanning, same-day digital impressions, treatment simulations, and three-dimensional visualisation into routine clinical practice, helping patients better understand their treatment while enhancing accuracy and efficiency. Patients seeking the best orthodontist in Bangalore for advanced clear aligner treatment and digital orthodontics benefit from her technology-driven approach and personalised care. Committed to lifelong learning, Dr. Darshini has completed numerous advanced certification programmes in biomechanics, digital orthodontics, self-ligating systems, artificial intelligence in orthodontics, clear aligner protocols, and skeletal anchorage. Her keen interest in research focuses on 3D orthodontics, craniofacial biomechanics, biomaterials, and digital treatment planning, reflecting her dedication to advancing the future of orthodontic care. Fluent in English, Kannada, and Tamil, she believes in building strong patient relationships through clear communication, compassion, and evidence-based treatment.
