

## **DR. SHIVANGI NEGI**

Associate Consultant - Gastroenterology

### **Qualification**

MBBS | MD (Medicine) | DrNB (Gastroenterology)

### **Overview**

Dr. Shivangi Negi is a highly skilled and dedicated Consultant Gastroenterologist in Delhi, with specialised expertise in hepatology, luminal gastroenterology, clinical nutrition, and therapeutic endoscopy. With a strong academic foundation and extensive tertiary care experience, she is committed to delivering comprehensive and patient-centred care for a wide range of digestive and liver disorders. Dr. Negi holds an MBBS degree followed by an MD in Medicine and a DrNB in Gastroenterology, reflecting her advanced training and deep clinical knowledge in the field. Her areas of special interest include hepatology and advanced liver diseases, where she focuses on managing complex conditions such as acute and chronic liver disorders, liver failure, and related complications. She is particularly adept at handling challenging gastrointestinal cases that require both precise diagnosis and advanced therapeutic interventions. In addition to her clinical practice, Dr. Negi has a keen interest in research and academics. She has contributed to medical literature with her publication titled “Outcome of Patients with Acute on Chronic Liver Failure Undergoing Plasmapheresis - An Observational Study,” published in the Journal of

Clinical and Experimental Hepatology in 2023. This work highlights her commitment to evidence-based medicine and improving outcomes for patients with severe liver disease. Her expertise in therapeutic endoscopy enables her to perform advanced endoscopic procedures with precision and safety, offering minimally invasive solutions for various gastrointestinal conditions. She also integrates nutritional guidance into her treatment plans, recognising the crucial role of diet and metabolic health in managing digestive and liver diseases. Dr. Shivangi Negi is a member of INASL (Indian National Association for the Study of the Liver), reflecting her active involvement in professional gastroenterology and hepatology circles. Fluent in Hindi, she ensures clear communication and compassionate care for her patients. Known for her methodical approach and empathetic patient interactions, Dr. Negi strives to provide holistic, evidence-driven treatment tailored to individual needs, helping patients achieve better digestive health and improved quality of life.

### **Fellowship & Membership**

- INASL
- ISG
- Faculty INASL - ILCA

### **Field of Expertise**

- Hepatology & Advanced Liver Diseases
- Acute liver failure (ALF) & Acute on chronic liver failure (ACLF)
- Plasmapheresis in ALF & ACLF
- Hepatitis B & Hepatitis C
- Cirrhosis and Liver cancer (HCC)
- Ascites, HE & variceal bleeding
- Fatty liver (MASLD)

- Liver diseases in pregnancy
- Inflammatory Bowel Disease
- Ulcerative colitis and Crohn's disease
- IBD flare management & long-term remission strategies
- Dysplasia surveillance and cancer prevention in IBD
- Pancreatic And Biliary Disorders
- Acute and chronic pancreatitis
- Pancreatic cystic lesion
- Pancreatic malignancy evaluation
- Gall bladder and biliary tract diseases
- ERCP & Advanced Pancreaticobiliary Endoscopy ERCP for bile duct stones & strictures
- Biliary & pancreatic duct stenting
- Management of obstructive jaundice
- Endoscopic Ultrasound
- Diagnostic EUS for pancreatic, biliary & submucosal lesions
- EUS guided FNAC/FNB
- Staging of GI malignancies
- Pancreatic cystic lesion evaluation
- Diagnostic & Therapeutic Endoscopy
- Upper GI Endoscopy & Colonoscopy
- Polypectomy & EMR
- Management of GI bleeding (including variceal therapy)
- Stricture dilatation

### **Languages Spoken**

- Hindi
- English

### **Talks & Publications**

- Outcome of patients with Acute on chronic liver failure undergoing plasmapheresis - An observational study - Journal of Clinical and Experimental Hepatology - 2023.
- Role of low volume plasmapheresis in acute liver failure - Case series - Journal of Clinical and Experimental Hepatology 2024.
- Veno-occlusive diseases (sinusoidal obstruction syndrome) - Case series - Journal of Clinical and Experimental Hepatology 2024.
- Endoscopic management of Barrett's Oesophagus - Yearbook of Surgery - 2025.
- Liver Diseases in the Elderly - Principles and Practices of Geriatric Medicine 2025.
