

DR. IPSITA BATRA

Consultant - Health Check OBG

Qualification

MBBS | MS (Obstetrics And Gynaecology) | Fellowship in Reproductive Medicine | MSHA (Healthcare Administration)

Overview

Dr. Ipsita Batra is an experienced Obstetrician and Gynaecologist in Electronics City with 13 years of clinical experience in women's health, Obstetrics and Gynaecology, and Reproductive Medicine. She currently practises as a Consultant – Department of Preventive Health and Screening at Manipal Hospital Electronics City, with expertise in primary care and wellness; women's health screening; preventive women's health; antenatal, intrapartum, and postnatal care; high-risk pregnancy management; infertility evaluation and management; reproductive medicine; contraception and family planning; menopause management; adolescent health; polyendocrine metabolic ovarian syndrome; preventive screenings like pap smears and mammograms; and outpatient gynaecologic care. Her broad clinical training and focus on comprehensive women's healthcare make her one of the best gynaecologists in Electronics City, Bangalore, for personalised and preventive women's healthcare. Dr. Ipsita completed her MBBS from Kasturba Medical College, Manipal, followed by an MS in Obstetrics and Gynaecology from Government Medical College, Tripura, India. She subsequently pursued a Fellowship in Reproductive Medicine from

Bangalore Assisted Conception Center. She also completed a Master of Science in Health Administration (MSHA) from Virginia Commonwealth University, Richmond, Virginia, USA, which helped her achieve a broader understanding of patient care, healthcare delivery, quality improvement, preventive health programmes, continuity of care, and the importance of communication and patient engagement in improving long-term health outcomes. At Manipal Hospital Electronics City, her clinical expertise encompasses women's healthcare across different stages of life. Dr. Ipsita provides antenatal, intrapartum, and postnatal care, with experience in managing high-risk pregnancies and supporting women through normal vaginal delivery and caesarean section. Her experience includes ovulation induction, follicular monitoring, ovum pickup, and embryo transfer. She also provides counselling and care related to contraception and family planning, adolescent health, polyendocrine metabolic ovarian syndrome, menopause management, and outpatient gynaecologic care. By integrating preventive assessment, including pap smears, mammograms, and vaccination programs, with clinical management, Dr. Ipsita focuses on identifying health concerns early and helping women make informed decisions about their ongoing healthcare. Dr. Ipsita also holds an MSHA in Health Administration. She has gained valuable exposure from the US to preventive care, chronic disease management, women's health, vaccination programs, patient education, integrated healthcare delivery, multidisciplinary care coordination, electronic medical record and health information systems, and healthcare analytics using tools such as Excel and Tableau. Her professional experience includes clinical work in women's health and outpatient care across India and the United States. Dr. Ipsita Batra is associated with the Department of Preventive Health and Screening, where her clinical background in Obstetrics and Gynaecology, Reproductive Medicine, preventive women's healthcare, and healthcare administration supports a comprehensive approach to women's health. She focuses on appropriate assessment, clear

counselling, preventive care, and personalised management across different stages of a woman's healthcare journey. She is a Member of FOGSI (Federation of Obstetric and Gynaecological Societies of India). Being one of the best gynaecologists in Electronics City, Bangalore, Dr. Ipsita Batra provides comprehensive women's healthcare with an emphasis on continuity, informed decision-making, and individualised care. She communicates in English and is committed to supporting women through preventive health needs, reproductive care, pregnancy, chronic disease management, and long-term gynaecological health.
