

DR. SRIHARSHA AJJUR

Consultant - Urology & Renal Transplant

Qualification

MS (General Surgery) | MCh (Urology)

Overview

Dr. Sriharsha Ajjur is a highly experienced urologist in Electronic City with more than fifteen years of experience in advanced urological care. He is currently practising as a Consultant – Urology & Renal Transplant at Manipal Hospital Electronic City, with expertise in reconstructive genitourinary surgery, laser treatment for urinary stones and prostate conditions, minimally invasive procedures for benign prostatic enlargement, advanced laparoscopy, robotic surgery, renal transplantation, and male genital reconstructive and aesthetic procedures. Dr. Sriharsha Ajjur completed his MS in General Surgery, followed by MCh in Urology. He subsequently pursued focused international training in functional urology and pelvic reconstructive surgery, as well as laser surgery and endourology, genitourinary reconstructive and gender reassignment surgery, and robotic surgery. These advanced fellowships and training programmes have strengthened his expertise in complex reconstructive, minimally invasive, and robotic urological procedures. At Manipal Hospital Electronic City, Bangalore, Dr. Sriharsha Ajjur’s clinical practice includes the management of complex urethral and genital conditions,

pelvic reconstructive concerns, and other urological disorders requiring advanced reconstructive techniques. His training in genitourinary and pelvic reconstructive surgery has further developed his expertise in restoring urinary and genital function while considering each patient's individual needs and quality-of-life goals. He performs procedures such as Retrograde Intrarenal Surgery (RIRS) and Endoscopic Combined Intrarenal Surgery (ECIRS) for selected kidney and urinary tract stones. He also has expertise in Holmium Laser Enucleation of the Prostate (HoLEP), including En-bloc HoLEP, for the surgical management of benign prostatic enlargement. His practice also incorporates minimally invasive surgical treatments for benign prostatic hyperplasia (BPH), including UroLift, Rezum, and iTIND, where clinically appropriate. Dr. Sriharsha’s robotic surgery training has enabled him to manage selected urological conditions using advanced technology and precision-oriented surgical techniques. Dr. Sriharsha has authored and co-authored 15 publications in international indexed journals and has delivered presentations at national and international scientific meetings. He received an International Travel Fellowship to the European Urology Residents Education Programme (EUREP) in Prague in 2014 and participated in the European Association of Urology scholarship programme for junior urologists, including a clinical visit to a specialised genital reconstructive surgery centre in Belgrade in 2016. He was also awarded the Vattikuti Robotic Surgeons Council Scholarship from the Vattikuti Foundation in 2016, supporting his advanced exposure to robotic surgery. Dr. Sriharsha is also associated with several professional organisations, including the Urological Society of India, North Zone Urological Society of India, European Association of Urology, International Continence Society, Société Internationale d'Urologie, and International Society for Sexual Medicine. Dr. Sriharsha’s patient-centred philosophy focuses on understanding each patient's condition and treatment priorities before recommending an appropriate intervention. As an experienced urologist in Electronic City, he communicates in Kannada, English, Hindi, and Punjabi, enabling

clear and comfortable communication with patients from diverse linguistic backgrounds.

Fellowship & Membership

- Functional Urology and Pelvic Reconstructive Surgery (Belgium)
- LASER surgeries in Urology (Germany)
- Genitourinary Reconstructive Surgery and Sex Reassignment Surgery (Belgrade)
- Robotic Surgery training (ORSI Academy, Belgium)

Field of Expertise

- Reconstructive genitourinary surgery
- LASER Surgery for stones (RIRS, ECIRS) and Prostate (HoLEP)
- Minimally Invasive Surgical Therapies (MIST)
- Treat an enlarged prostate (BPH), LIKE Urolift, REZUM, and iTIND
- Sex reassignment Surgery
- Penile and testicular prosthesis
- Advanced Laparoscopy and Robotic surgery
- Renal Transplantation
- Aesthetic Surgeries for Male Genitalia

Languages Spoken

- Kannada
- English
- Hindi
- Punjabi

Awards & Achievements

- International travel fellowship to EUREP, Prague, Czech Republic, 2014, at USICON 2014, New Delhi.
- European Association of Urology scholarship program for junior urologists- clinical visit to Belgrade Centre for genital reconstructive surgery, 2016.
- Vattikuti Robotic Surgeons Council Scholarship 2016 from Vattikuti Foundation(MI, USA).

Talks & Publications

- Authored 15 publications in International Indexed Journals.
