

DR. ATUL GUPTA

Consultant - Neurosurgery

Qualification

MBBS | MS | MCH (Neurosurgery)

Overview

Dr. Atul Gupta is the best neurosurgeon in Ghaziabad. He presently works as a consultant at the neurosurgery department of Manipal Hospitals in Ghaziabad. Dr. Atul has completed his MBBS, MS, and MCH programmes in neurosurgery. His area of expertise includes the treatment of Brain and Spinal Injury, Brain and Spinal Lesions including tumours and Congenital Anomalies of the Brain and Spine. Dr. Atul has handled various challenging situations and has numerous successful stories and complex cases to share. To improve the patient experience, Dr. Atul is constantly eager to adopt new technologies, start new projects, and change the approach. He has experience in treating patients from a variety of geographical origins. He is proficient in Hindi and English. Dr. Gupta encourages open communication with his patients and urges and provides them with a comfortable, private setting where they may freely express themselves. He has collaborated with multiple media houses on various events and occasions dedicated to national and international health days. He has shared articles, thoughts, and accurate medical information with the general public through these associations. Dr. Atul is sincere,

passionate and dedicated towards his role and responsibilities. His dedication to advancing medical knowledge and improving patient care is commendable and he is always on his toes to learn and adopt ways that benefit the patients in any manner. Last but not least, his outstanding reputation, remarkable accomplishments, and commitment to patient care have earned him positive feedback from all the patients. He also actively participates in conferences and events that address issues including enhancing patient outcomes and care, reducing medical mistakes, managing trauma situations, and patient management. Self-motivated and passionate about his work and patients, Dr. Atul concurs and follows the vision and spirit of Manipal, which place a strong focus on patient-centeredness, clinical excellence and ethical behaviour.
