

## **DR. SANJAY KUMAR SHARMA**

Consultant - CTVS

### **Qualification**

MBBS | MS (Gen Surgery) | DNB (Cardiothoracic Surgery)

### **Overview**

Dr. Sanjay Kumar Sharma is a highly accomplished and respected cardiothoracic vascular surgeon with over 21 years of extensive clinical experience in adult cardiothoracic vascular surgery. A graduate of MBBS and MS in General Surgery, he further honed his expertise by earning a Diplomate of National Board (DNB) in Cardiothoracic Surgery, establishing a strong foundation in complex cardiac procedures. Dr. Sharma specialises in adult cardiothoracic surgery with a particular focus on minimally invasive techniques and heart port access procedures. His advanced training in structural heart disease and cardiac transplantation sets him apart as a surgeon capable of handling some of the most intricate and high-risk cardiac conditions. He is known for integrating precision, innovation, and compassion in every aspect of patient care. Over the past two decades, Dr. Sharma has performed a wide range of procedures, including coronary artery bypass grafting (CABG), valve repairs and replacements, aortic surgeries, and minimally invasive heart surgeries. His expertise in heart port surgery offers patients the advantage of reduced pain, smaller incisions, quicker recovery times, and shorter hospital stays.

Dr. Sharma's dedication to continuous learning and patient-centred care has earned him recognition among peers and patients alike. He remains actively involved in academic discussions, surgical workshops, and training programs, contributing to the advancement of cardiothoracic surgical techniques in India and beyond. With a deep commitment to excellence and innovation, Dr. Sanjay Kumar Sharma continues to serve as a leading figure in the field of adult cardiothoracic surgery, offering the highest standards of care and surgical outcomes for patients suffering from complex heart conditions.

### **Fellowship & Membership**

- IACTS ( Life member)

### **Field of Expertise**

- Minimal access CABG.
- Minimal access heart valve repair and replacement.
- Minimal access ASD and intra-cardiac defect repair.
- Robotic-assisted Cardiac surgery- CABG, Heart valve, ASD.
- Robotic-assisted thoracic procedures.
- Beating heart CABG.
- Congenital heart surgeries in adults.
- Redo cardiac surgeries.
- Hybrid cardiac procedures in collaboration with interventional cardiologists.
