

DR. BHARAT BHUSHAN BASSAN

Consultant - Head & Neck Surgical Oncologist

Qualification

MBBS | MS | FHNS

Overview

Dr Bharat Bhushan Bassan is a distinguished Head & Neck Surgical Oncologist with over eight years of advanced experience in managing complex oncologic cases across leading tertiary care institutions in India. He specialises in delivering precision-driven, patient-centric cancer care with a strong emphasis on surgical excellence and innovation. Dr Bassan is highly skilled in a wide spectrum of procedures, including thyroidectomy, parotidectomy, neck dissections, glossectomy, laryngectomy, and composite resections with reconstruction. He has particular expertise in minimally invasive and robotic techniques such as Transoral Robotic Surgery (TORS) and robotic neck dissection, reflecting his commitment to advancing modern oncologic practices. His approach integrates meticulous preoperative planning, precise surgical execution, and comprehensive postoperative care to optimise patient outcomes. He completed a prestigious fellowship in Head and Neck Surgery from Tata Medical Centre, Kolkata, following his M.S. in ENT & Head and Neck Surgery from Government Medical College, Srinagar. Over the course of his career, he has held key roles at reputed institutions, where he

contributed to surgical innovation, multidisciplinary tumour board discussions, and academic mentorship. An active contributor to clinical research, Dr Bassan has multiple publications in reputed journals, particularly in the field of robotic head and neck oncology. Known for his empathetic communication, ethical practice, and collaborative approach, he remains deeply committed to enhancing cancer care through continuous learning, research, and adoption of advanced surgical technologies. In addition to his clinical and surgical expertise, Dr Bassan is actively involved in advancing patient awareness and education regarding early cancer detection and treatment options. He consistently advocates for evidence-based practices and the integration of emerging technologies to improve surgical precision and recovery outcomes. His ability to combine technical proficiency with compassionate care has earned him the trust of patients and peers alike. Through continuous professional development and participation in national and international forums, he remains at the forefront of innovations in head and neck oncology, striving to deliver the highest standards of care.
