

DR. ABAD KHAN

Consultant - Cardiology

Qualification

MBBS | MD Medicine (Gold medallist) | DM Cardiology (Gold medallist) | CTO Fellowship (JAPAN)

Overview

Dr. Abad Khan is a highly distinguished and trailblazing Interventional Cardiologist, renowned for his exceptional expertise in complex coronary and structural heart interventions. His foundation of medical excellence is built upon an impeccable academic record, holding the rare and prestigious distinction of being a double Gold Medalist in both his MD in General Medicine from Aligarh Muslim University and his DM in Cardiology from SKIMS. Driven by a commitment to global medical advancements, Dr. Khan further elevated his technical mastery through a highly specialized Chronic Total Occlusion (CTO) Observership at the renowned Sapporo Cardiovascular Center in Japan. Throughout his illustrious career, Dr. Khan has consistently redefined cardiovascular care by achieving numerous pioneering medical milestones in the Ghaziabad district. He holds the remarkable record of performing the district's first VSD device closure, its first orbital atherectomy, and its first mechanical thrombo-embolectomy to save a patient suffering from a massive pulmonary embolism. Additionally, he executed the first carotid angioplasty utilizing an Emboshield device for stroke prevention. Exhibiting profound surgical mastery, he is

currently the youngest cardiologist in Northern India performing retrograde CTO angioplasties and remains the exclusive specialist in Western Uttar Pradesh capable of executing these ultra-complex procedures alongside percutaneous ASD, VSD, and BMV interventions. Beyond his clinical practice, Dr. Khan is a registered regional proctor, actively training fellow cardiologists in advanced therapies such as rotablation and structural heart repairs. He is deeply committed to progressive, minimally invasive treatments, championing stent-less angioplasties utilising cutting-edge Drug-Coated Balloons. His technical proficiency seamlessly extends to managing heavily calcified blockages with advanced calcium-debulking tools and performing life-saving pacemaker and ICD device implantations. Complementing his clinical brilliance is a robust academic portfolio, featuring significant research on cardiac biomarkers published in prestigious journals like the Journal of the American College of Cardiology, cementing his status as a visionary leader in modern cardiology.

Field of Expertise

- Coronary interventions
- Complex & Chip angioplasty
- Proctor for CTO Angioplasty
- Proctor for BMV/ PTMC
- Device closures (ASD /VSD /PDA)
- Pacemaker and CRT-D
- TAVR
- Mechanical hemodynamic support / IABP
- Carotid angioplasty for stroke intervention
- Failing Dialysis fistula angioplasty for CKD
- Peripheral angioplasty in PVD
- IVC filter
- Pulmonary embolism and Pulmonary Embolectomy
