

DR. PRIYANKA GARG

Consultant - Anesthesiologist

Qualification

MBBS | DA | DNB

Overview

Dr. Priyanka Garg is an accomplished Consultant - Anesthesiologist in Gurgaon with over 20 years of distinguished clinical experience. She completed her MBBS from Lady Hardinge Medical College (Gold Medallist) and pursued post-graduation in Anaesthesia from Maulana Azad Medical College. Her career spans various leading institutions, including Medanta, Artemis, Max, Paras Hospitals, LNJP, associated GB Pant Hospital, Lady Hardinge Medical College and associated SSKH Hospital. She brings a patient-centred approach to anaesthesia care with expertise in robotic, transplant, neuro, thoracic, critical care anaesthesia, as well as chronic pain management. Dr. Priyanka is actively involved in academic programs and has guided DNB students in their dissertation work for nearly a decade. She also contributes to ongoing professional development within her speciality. Dr. Priyanka develops a tailored anaesthesia plan considering the type of surgery and patient condition. She also explains the anaesthesia process to the patient and obtains informed consent. Dr. Priyanka monitors anaesthesia depth and adjusts dosage based on surgical needs and patient response. She responds immediately to physiological changes

or complications and manages emergency resuscitation and advanced airway techniques if needed. Dr. Priyanaka provides acute pain management during post-op and ICU stays. She offers chronic pain treatments, including nerve blocks, spinal injections, or pharmacologic regimens. Dr. Priyanka also collaborates with pain clinics for cancer pain or palliative care. Dr. Priyanka is admired by her staff and patients alike for her calm ways to manage any crisis situation and rapid decision-making. She has excellent communication and interpersonal skills that help her connect with the patients and build trust. Dr. Priyanka has a strong ethical and safety-oriented mindset that aligns with the key mottos of Manipal Hospital, which are: ethical practices, clinical excellence and patient centricity. She always aspires to stay updated about the latest technology and trends in her field, and to ensure this, she actively participates in events and CMEs that discuss the global advancements in the field of anesthesiology.
