

DR. ARIF AKHTAR

Principal Consultant - Urology, Robotics And Renal Transplant

Qualification

MBBS | MS (General Surgery) | M. Ch. Urology (Magister Chirurgiae)

Overview

Dr Arif Akhtar is a highly experienced urologist with over 13 years of surgical expertise in managing a wide spectrum of urological conditions, including kidney diseases and genitourinary cancers. Known for his precision-driven approach, he has successfully performed more than 10,000 urological procedures, covering kidney stones, prostate disorders, urinary tract conditions, and complex malignancies. His clinical expertise spans advanced minimally invasive and laparoscopic surgeries, robotic-assisted urological procedures, and renal transplantation. Dr Akhtar is particularly skilled in the management of complex stone disease using techniques such as Mini PCNL, RIRS, and ECIRS, ensuring effective outcomes with faster recovery. He also performs reconstructive urology procedures, including urethroplasty and surgeries for congenital abnormalities, along with specialised treatments in andrology such as penile implant surgery and male infertility management. Dr Akhtar has extensive experience in kidney transplantation, including donor nephrectomy and recipient surgeries, as well as managing post-transplant complications. His expertise also extends to uro-oncology, where he provides

comprehensive care for cancers of the kidney, bladder, prostate, and urinary tract using advanced surgical and multidisciplinary approaches. In addition to adult urology, he is proficient in pediatric urology and the management of female urological conditions, including urinary incontinence and structural abnormalities. His approach emphasises minimally invasive techniques, aiming to reduce patient discomfort, shorten hospital stays, and enhance recovery outcomes. Recognised for his contributions to urology and renal transplant surgery, Dr Akhtar has received multiple accolades for clinical excellence. He is committed to delivering patient-centric care, combining advanced technology with compassionate treatment to achieve optimal outcomes and improve overall quality of life.

Fellowship & Membership

- VattiKutiti Travelling Scholarship (Robotic)

Field of Expertise

- Minimally Invasive Surgeries for stones including Mini PCNL, RIRS, ECIRS
- Advanced Laparoscopic Surgery for benign and malignant conditions of kidney ureter bladder and prostate.
Reconstruction including urethroplasty, female urethroplasty including surgeries for inborn structural abnormality
- Penile implant surgery (Indian variant as well as an inflatable penile prosthesis)
- Surgeries for Male and female infertility
- Robotic-assisted urological surgeries
- Kidney transplant (laparoscopic donor nephrectomy, recipient surgery including ABO incompatible kidney transplant)
Pediatric/ childhood disease treatment and surgery

Languages Spoken

- English
- Hindi

Awards & Achievements

- Has won the Global Glorious Award in recognition of Outstanding Contribution in the realm of Uro-Oncology and Kidney Transplant Surgery
- Awarded with a certificate of achievement from Medilinks India for being an “Emerging Urologist and Kidney Transplant Surgeon of the Year (2020)”
- Has been presented with the Global Glorious Award in recognition of Outstanding Contribution in the realm of Uro-Oncology and Kidney Transplant Surgery
