

DR. ASHISH SINGH

Associate Consultant - Urology

Qualification

MBBS | MS | DNB

Overview

Dr Ashish Singh is a skilled and extensively trained urologist with expertise in managing a wide range of urological conditions using both advanced and minimally invasive techniques. His clinical focus includes endourology, renal transplantation, robotic-assisted procedures, and urological emergencies, enabling him to deliver precise and effective care across complex cases. He has significant hands-on experience in high-volume surgical settings, having assisted in over 100 robotic urological procedures, 100+ renal transplant surgeries, and numerous living donor nephrectomies. His surgical proficiency spans open, laparoscopic, and endoscopic techniques, ensuring tailored treatment approaches based on each patient’s condition and recovery needs. Dr Singh’s core areas of expertise include the management of kidney stones through advanced procedures such as ureteroscopy, RIRS, and PCNL, as well as the treatment of benign prostatic enlargement using modern endoscopic techniques. He also has experience in uro-oncology, addressing cancers of the kidney, bladder, prostate, and testis with a comprehensive and multidisciplinary approach. His practice further extends to andrology, including male infertility and

sexual health concerns, as well as female urology and neuro-urology, focusing on urinary incontinence and bladder dysfunction. Alongside his clinical work, Dr Singh actively contributes to academic research and has presented at multiple national and international conferences. He has received recognition for his academic excellence and clinical insights through various awards and competitive platforms. Committed to delivering patient-centric care, Dr Singh emphasises early diagnosis, evidence-based treatment, and holistic recovery, helping patients achieve improved outcomes and a better quality of life. He believes in clear communication and patient education, ensuring individuals are well-informed about their condition and treatment options. His approach prioritises safety, precision, and faster recovery, with a strong emphasis on minimally invasive techniques that reduce hospital stay and improve overall patient comfort. He remains dedicated to continuous learning and adopting evolving urological advancements to further enhance treatment outcomes and patient care standards.

Fellowship & Membership

- Société Internationale d'Urologie (SIU)
- Urological Society of India (USI)
- North Zone Urological Society of India (NZ-USI)
- Association of Surgeons of India (ASI)

Field of Expertise

- Endourology & Urolithiasis: Comprehensive management of renal and ureteric calculi including ureteroscopy, RIRS, PCNL and complex stone disease.
- Renal Transplantation: Experience in donor nephrectomy, recipient surgery assistance and post-transplant urological management including transplant complications.

- Benign Prostatic Enlargement (BPE): Evaluation and surgical management including endoscopic procedures for bladder outlet obstruction.
- Andrology & Male Health: Evaluation and management of male infertility, erectile dysfunction, and other male sexual health disorders.
- Uro-Oncology: Diagnosis and management of urological malignancies including kidney, bladder, prostate and testicular cancers.
- Female Urology: Management of urinary incontinence, pelvic floor dysfunction and lower urinary tract disorders in women.
- Neuro-Urology: Evaluation and management of neurogenic bladder dysfunction including urodynamic assessment and bladder management strategies.
