

DR. (COL) RAJEEV SOOD

Chairman - Urology, Robotics And Renal Transplant

Qualification

MBBS | MS (General Surgery) | DNB (NBE) General Surgery | M.Ch Urology | DNB (NBE) Genito-urinary Surgery

Overview

Dr. Rajeev Sood brings with him more than 23 years of distinguished service in the Armed Forces and over 33 years of super-specialized experience in urology. A graduate of the 1976 batch of the Armed Forces Medical College, he is a Gold Medallist across MBBS, MS, and MCh, reflecting sustained academic excellence alongside his clinical achievements. As a surgeon, he was conferred the Vishisht Seva Medal by the President of India in 1993 in recognition of performance that went beyond the call of duty, a distinction that underscores both his skill and commitment to patient care. During his tenure with the Armed Forces, he played a pioneering role in initiating and advancing cadaver renal transplant programs as well as laparoscopic urology services, contributing significantly to the evolution of these disciplines in India. He is widely regarded as a highly skilled endourologist and has demonstrated the free-hand puncture technique in PCNL at numerous national and international workshops, earning recognition for both his surgical precision and teaching ability. He was among the earliest to introduce holmium laser enucleation of the prostate in North India in 1999 and subsequently pioneered Green laser vaporization of the

prostate in India in 2003, with his Green laser resection technique being presented at the Asian Urology Conference in Delhi in 2004. Following his voluntary retirement from the Armed Forces in 2003, Dr. Sood transitioned to the private healthcare sector in Delhi, where he has continued to build and lead high-impact clinical programs. Currently serving as Chairman of Urology, Robotics, and Renal Transplant at Manipal Hospital, Gurgaon, he has performed over 4,000 renal transplants, placing him among the most experienced transplant surgeons in the region. His expertise extends beyond India, as he actively mentors transplant surgeons in Ghana, Nigeria, Sudan, Iraq, Mongolia, Kyrgyzstan, Afghanistan and Myanmar. Currently he performs renal transplant procedures on a regular basis in Ghana & Nigeria. Dr. Sood has been a driving force behind the development and widespread adoption of Green Laser Prostatectomy programs in India, and his contributions to the field continue to shape contemporary urological practice. In addition to his clinical work, he remains deeply engaged in academics, having served as faculty at numerous national and international workshops, where he shares his knowledge and experience with the next generation of surgeons.

Fellowship & Membership

- Indian Urology Society & North-Zone
- Urology Society of India
- American Urology Society
- European Urology Society
- Asian Urology Society
- Society Internationale Urology

Field of Expertise

- Renal Transplantation

- Minimally Invasive Urology
- Green Laser Prostatectomy
- Penile Implantation
- Laparoscopic Urology
- Uro-Oncology Surgery
- Urinary Tract Infection (UTI)
- Transurethral Incision of The Prostate (TUIP)
- Vascular Trauma
- Kidney Disease Treatment
- Blood in Urine (Hematuria) Treatment
- Neurourology
- Varicocele Surgery
- Male Hypogonadism
- Radical Cystectomy
