

DR. ARJUN SATHYANARAYANA

Consultant – Vascular and Endovascular Surgery

Qualification

M.B.B.S | M.S (General Surgery) | D.N.B (Vascular and Endovascular Surgery)

Overview

Dr. Arjun Sathyanarayana is a highly skilled vascular surgeon in Hebbal. He is currently practising as a Consultant – Vascular and Endovascular Surgery at Manipal Hospital Hebbal, Bangalore, delivering advanced care for patients with complex arterial and venous disorders. With strong academic training and focused expertise in modern vascular and minimally invasive endovascular procedures, Dr. Arjun is known for his precision-based surgical approach, sound clinical judgement, and commitment to comprehensive, patient-centred vascular care. He completed his MBBS and MS in General Surgery from Vydehi Institute of Medical Sciences and Research Centre, followed by a DNB in Vascular and Endovascular Surgery from Medanta – The Medicity, Gurugram, one of India's leading centres for advanced vascular interventions. This extensive training has equipped him with in-depth expertise in the diagnosis and management of peripheral arterial disease, venous disorders, vascular trauma, aneurysmal disease, and complex thromboembolic conditions. Over the years, he has developed a strong clinical foundation in both open vascular surgery and image-guided endovascular therapies. Dr. Arjun's practice

encompasses a wide spectrum of vascular and endovascular procedures, including arterial thromboendarterectomy and embolectomy, peripheral arterial bypass surgeries, endovascular angioplasty and stenting of arteries and veins, catheter-directed thrombolysis, and inferior vena cava (IVC) filter placement for pulmonary embolism management. He has extensive experience in treating limb-threatening ischemia, acute arterial and venous occlusions, and traumatic vascular injuries, using a combination of open surgical reconstruction and minimally invasive endovascular techniques to optimise outcomes and limb preservation. A key focus of his work lies in the comprehensive management of varicose veins and chronic venous insufficiency, where he offers the full range of modern therapies including endovenous laser treatment (EVLT), radiofrequency ablation (RFA), mechanochemical ablation (MOCA), Venaseal closure, and foam sclerotherapy. His approach emphasises accurate duplex-based evaluation, minimally invasive correction, and structured long-term follow-up to ensure durable symptom relief and improved quality of life. Dr. Arjun also has advanced expertise in dialysis access surgery, performing both creation and salvage procedures such as arteriovenous fistulas, grafts, basilic vein transpositions, fistula thrombectomy, and angioplasty. His clinical interests further include endovascular repair of thoracic and abdominal aortic aneurysms and dissections, carotid artery surgery and stenting, mesenteric artery angioplasty, uterine artery embolisation, angioembolisation for bleeding and vascular malformations, and fluoroscopy-guided placement of long-term vascular access devices. Beyond procedural care, Dr. Arjun places strong emphasis on vascular medicine, offering evidence-based non-surgical management for conditions such as atherosclerosis, Buerger’s disease, deep vein thrombosis, and diabetic vascular complications. He is particularly experienced in specialised diabetic foot care and advanced wound management, working closely with multidisciplinary teams to prevent amputations and promote long-term limb salvage. His proficiency in vascular ultrasound and duplex

imaging further supports precise diagnosis, procedural planning, and post-treatment surveillance. Dr. Arjun has also been actively involved in medical education and academic development. He has taught undergraduate and postgraduate surgical trainees, conducted bedside clinics, demonstrated operative techniques, and delivered structured teaching sessions on vascular surgery topics. His research interests include radiation safety in endovascular procedures, and he has received recognition at national surgical conferences for his academic presentations. He is a life member of the Vascular Society of India, reflecting his ongoing engagement with professional advancement and ethical surgical practice. At Manipal Hospital Hebbal, Dr. Arjun is widely appreciated for his clear communication, ethical standards, decisive emergency care, and organised long-term follow-up strategies. Patients seeking the best vascular surgeon in Hebbal value his ability to combine advanced technology with personalised care, ensuring that every treatment plan is tailored to both the medical condition and the individual's lifestyle and long-term vascular health. With his comprehensive training, broad procedural expertise, and dedication to continuous learning, Dr. Arjun Sathyanarayana plays a vital role in strengthening advanced vascular services at Manipal Hospital Hebbal, delivering reliable, evidence-based care across the full spectrum of vascular and endovascular diseases.

Field of Expertise

- Arterial Bypass (Aorta iliac/femoral, Femoral Popliteal/Tibial, Upper Limb Bypass)
- EVAR/TEVAR for Aortic Aneurysms
- Peripheral Angioplasty/Stenting/Arterial Bypass
- Carotid Endarterectomy
- Vascular Trauma Repair
- AV Access Creation
- Chemoport Insertion

- Varicose Veins Surgery (Endovenous Ablation, Radio Frequency, Endovenous Glue Ablation)
- Thrombolysis for DVT
- IVT Filter Insertion
- AV Malformation Surgery & Endovascular Interventions
- Diabetic Foot Care
