

DR. RAMESH PATIL

Consultant - Neurology

Qualification

MBBS | MD (General Medicine) | DM (Neurology)

Overview

Dr. Ramesh Patil is a Leading neurologist in hebbal, Bangalore, currently practising as a Consultant – Neurology at Manipal Hospital Hebbal, bringing with him years of expertise in diagnosing and managing complex neurological disorders. With a strong academic foundation and extensive clinical experience, he is widely recognised among the best neurologists in Hebbal, known for his precision in patient evaluation and evidence-based therapeutic interventions. His professional journey reflects an unwavering commitment to improving neurological health through compassionate, personalised, and research-driven care. Having earned his MBBS and DM in Neurology from Bangalore Medical College and Research Institute (BMCRI), one of India’s most prestigious medical institutions, Dr. Patil has consistently demonstrated deep clinical insight and diagnostic excellence. His journey in medicine began with a fascination for the human nervous system, a field that demands not only intellectual depth but also empathy and patience. He went on to complete his MD in General Medicine from Seth GS Medical College, Mumbai, where he developed a strong foundation in internal medicine, which later enriched his

neurological practice. Over the years, Dr. Patil has built significant expertise across a wide spectrum of neurological disorders, including headache management, stroke care, neuromuscular disorders, epilepsy, and neuroinfectious diseases. His detailed and holistic approach ensures that each patient receives an accurate diagnosis followed by a carefully personalised treatment plan. His clinical acumen extends to managing acute and chronic neurological conditions, from sudden strokes and seizures to progressive neuromuscular disorders and infections affecting the brain and spinal cord. Dr. Patil is especially regarded for his work in headache and migraine management, where he integrates medical precision with lifestyle guidance and preventive care. His special interest in neuroinfectious diseases reflects his in-depth understanding of infections that impact the nervous system, an area particularly relevant in tropical climates like India’s. His research during postgraduate training, which explored the prevalence and risk factors of restless legs syndrome in migraine patients, further underlines his commitment to advancing knowledge and patient care in headache neurology. With extensive academic experience as an Assistant Professor in Neurology at leading institutions, Dr. Patil has also contributed to training the next generation of clinicians. His academic pursuits include poster presentations at major national conferences such as the Indian Stroke Conference (2017) and IANCON (2018), where he presented on rare and challenging neurological conditions, reflecting his keen interest in clinical neurology and medical research. Currently serving at Manipal Hospital Hebbal, Dr. Patil is committed to providing world-class neurological care supported by advanced diagnostic technology and a multidisciplinary approach. His philosophy of care is rooted in empathy, patient education, and continuity of treatment, ensuring long-term neurological well-being. Fluent in English, Hindi, and Kannada, he connects deeply with his patients and their families, ensuring that complex medical information is communicated clearly and sensitively. His patients value his

meticulous attention to detail, calm demeanour, and ability to explain intricate neurological issues in understandable terms. This thoughtful, patient-focused approach has earned him recognition among the best neurologists in Hebbal, trusted by both patients and peers for his sound clinical judgement and dedication to improving quality of life for those affected by neurological disorders. Whether managing emergency stroke cases, diagnosing complex nerve diseases, or providing long-term epilepsy care, Dr. Ramesh Patil continues to bring excellence and integrity to every aspect of his practice, making him one of the best neurologists in Hebbal for comprehensive neurological evaluation and treatment.
