

DR. VIKAS PILANIYA

Consultant - Pulmonary (respiratory and Sleep Medicine)

Qualification

MBBS | MD | DM - Respiratory Medicine

Overview

Dr. Vikas Pilaniya is a renowned pulmonologist in Jaipur. He specialises in diagnosing and treating diseases related to the lungs and respiratory system. Dr. Vikas has vast experience in the field, and his areas of expertise are: Interventional Pulmonology, Lung Cancer, Respiratory Allergies, Sleep Medicine, and ILDS. He is widely known for managing chronic lung diseases, infectious conditions (like tuberculosis), sleep disorders, and critical care cases. Dr. Vikas works closely with infectious disease specialists, thoracic surgeons, oncologists, and radiologists for comprehensive pulmonary care. He participates in tumour boards and sleep disorder clinics. Dr. Vikas coordinates care for patients with comorbidities like heart disease, diabetes, or autoimmune conditions. He believes in empowering patients with the right knowledge, hence, he always ensures that his patients are aware of every aspect of the disease and the treatment. Dr. Vikas addresses all the concerns a patient may have and counsels patients and families on disease nature, prognosis, lifestyle changes, smoking cessation, and environmental triggers. Dr. Vikas maintains accurate medical records and case histories to track the development. He ensures compliance

with our hospital protocols, infection control standards, and clinical guidelines. Besides offering the best care and treatment to the patients, Dr. Vikas actively participates in events that talk about the latest advancements in his field globally. His academic work has been part of reputed medical journals and publications. Dr. Vikas is fluent in Hindi, English, Marathi, Haryanvi and Rajasthani and has treated patients from diverse geographical and cultural backgrounds. His patients admire him for his sincere and compassionate conduct. The positive reviews he has garnered over these years are a testament to the great work he is doing. Dr. Vikas always aims to develop a personalised treatment plan for his patients based on their specific requirements and recovery goals.
