

DR. MAYUR R SHETTY

Consultant - Plastic Surgery

Qualification

MBBS | MS (GEN.SURGERY) | MCh (PLASTIC SURGERY)

Overview

Dr. Mayur R Shetty is a distinguished plastic and cosmetic surgeon in Kanakapura Road with over 10+ years of experience in aesthetic, reconstructive, and microvascular surgery. He is currently practising as a Consultant – Plastic Surgery at Manipal Hospital Kanakapura Road. Dr. Shetty has advanced expertise in cosmetic facial procedures, body contouring surgery, hand and microvascular reconstruction, burns management, and post-trauma reconstructive surgery. His work in aesthetic and reconstructive plastic surgery has positioned him among the best plastic surgeons in Kanakapura Road for personalised cosmetic transformation and complex reconstructive care. Dr. Shetty completed his MBBS at Kasturba Medical College, Mangalore, followed by an MS in General Surgery from KIMS, Bangalore. He subsequently pursued his MCh in Plastic Surgery from St. John's Medical College & Hospital, Bangalore, where he underwent extensive surgical training in cosmetic, reconstructive, trauma, and microvascular procedures. To further refine his expertise in advanced aesthetic techniques, he completed a Fellowship training in Facial Cosmetic Surgery and Body Contouring in Dubai and an additional Fellowship in Cosmetic Surgery

in Delhi. He has also completed a postgraduate program in Hospital Administration from IIM Bangalore, reflecting his wider understanding of clinical systems, patient experience, and surgical practice management. At Manipal Hospital Kanakapura Road, Dr. Mayur Shetty performs a broad spectrum of cosmetic and reconstructive procedures with emphasis on precision, functional restoration, and aesthetic balance. His clinical expertise includes rhinoplasty, liposuction, abdominoplasty, facelift surgery, neck lift procedures, breast augmentation and reduction, body contouring after weight loss, fat grafting, scar revision surgery, buttock augmentation, and vaginal rejuvenation procedures. In reconstructive surgery, he manages complex soft tissue defects, post-cancer reconstruction, burn deformities, facial trauma, hand injuries, and microvascular tissue transfer procedures requiring advanced surgical planning and multidisciplinary coordination. Dr. Shetty's expertise also extends to hand and microvascular surgery, including extremity salvage, tendon and nerve repair, free flap reconstruction, and trauma-related reconstruction. He effectively manages patients requiring complex reconstructive planning after oncological surgery, severe trauma, burns, or congenital deformities. Dr. Shetty is also actively involved in high-volume reconstructive surgical care, including post-onco resection reconstruction, facial trauma correction, and advanced wound management. His expertise in combining reconstructive precision with aesthetic restoration has established him among the best plastic surgeons in Kanakapura Road, Bangalore, for both cosmetic enhancement and functional reconstruction. Dr. Mayur Shetty remains actively involved in academic research, publications, and professional education. He has contributed to scientific literature in plastic and reconstructive surgery and serves on academic and editorial platforms within the speciality. He is affiliated with leading professional bodies, including the International Society of Aesthetic Plastic Surgeons (ISAPS), the Indian Association of Aesthetic Plastic Surgeons (IAAPS), and the Karnataka Association of Plastic and Reconstructive Surgeons

(KAPRAS). Fluent in English, Kannada, Hindi, and Tulu, he ensures clear and detailed communication throughout the surgical journey, helping patients make informed decisions with confidence and clarity.

Awards & Achievements

- Started the NH Aesthetic Centre as a separate sub-speciality with all aesthetic services under one unit.
- As the clinical lead, I have set up the Department of Plastic and Reconstructive Surgery, which was initially only an extension of Head and Neck Surgery.
- The department has seen an increase in the number of major surgeries performed, from an average of
