### DR. GOPALKRISHNA S GUMASTE

Consultant - Interventional Cardiology

# Qualification

MBBS | MD General Medicine | DM Cardiology

### Overview

Dr. Gopalkrishna S Gumaste Deshpande is an experienced interventional cardiologist in Bangalore, practising as a Consultant -Interventional Cardiology at Manipal Hospital Kanakapura Road, Bangalore. Dr. Gopalkrishna brings over 6+ years of experience in clinical cardiology, complemented by more than 3+ years specialising in interventional cardiology. He expertly manages various heart conditions using advanced diagnostic and therapeutic techniques. He focuses on delivering precise, minimally invasive treatments that improve heart function and patient outcomes. He is an experienced Interventional Cardiologist in Kanakapura Road. Dr. Gopalkrishna completed his MBBS from Kempegowda Institute of Medical Sciences (KIMS), Hubli, followed by an MD in General Medicine from Pt. Jawahar Lal Nehru Memorial Medical College, Raipur. He further went rigorous training in cardiology, completing his DM in Cardiology from Bangalore Medical College and Research Institute (BMCRI), Bengaluru. This extensive education allows him to diagnose complex cardiac conditions and confidently perform state-of-the-art interventions. At Manipal Hospitals, Dr. Gopalkrishna specialises in percutaneous coronary interventions (PCI), including complex procedures such as left main PCI, bifurcation PCI, and chronic total occlusion (CTO) PCI. These minimally invasive procedures restore blood flow in blocked coronary

arteries, significantly reducing symptoms like chest pain and preventing heart attacks. His skill in these intricate techniques gives you the best chance for a quick recovery and improved heart health. He also uses cutting-edge imaging technologies, such as intracoronary imaging, to guide interventions with accuracy and safety. In addition to coronary interventions, Dr. Gopalkrishna is proficient in structural heart procedures like Transcatheter Aortic Valve Implantation/Replacement (TAVI/TAVR). This innovative technique offers a life-changing alternative to open-heart surgery for patients with severe valve diseases who are at higher surgical risk. Dr. Gopalkrishna also manages the implantation of pacemakers and other cardiac devices which regulate heart rhythms and enhance the quality of life for patients with arrhythmias or heart block. Dr. Gopalkrishna emphasises patient education and personalised treatment plans. Before any procedure, he thoroughly evaluates your health status, explains all options, and tailors treatments to your needs and preferences. His compassionate communication style builds trust and helps reduce anxiety related to heart procedures. Beyond clinical practice, Dr. Gopalkrishna actively participates in academic research and professional forums. He has earned distinctions such as ranking third in his super-speciality exams and winning awards for his research presentations. Dr. Gopalkrishna speaks English, Hindi, and Kannada, allowing him to communicate effectively with a diverse patient population.
