

DR. DEEPESH V

Consultant - Nephrology and Renal Transplant Physician

Qualification

MBBS | MD (Int Medicine) | DNB (Nephrology)

Overview

Dr. Deepesh V is an experienced nephrologist in Bangalore. He is currently practising as a Consultant - Nephrology & Renal Transplant Physician at Manipal Hospital Kanakapura Road. With extensive experience in nephrology and renal transplantation, his clinical expertise spans a wide range of renal disorders, including acute kidney injury, chronic kidney disease, kidney stones, glomerular diseases, polycystic kidney disease, recurrent urinary tract infections, and resistant hypertension. Dr. Deepesh delivers evidence-based, comprehensive treatment plans that improve patient outcomes across all stages of kidney disease. Dr. Deepesh completed his MBBS from Bangalore Medical College, Bangalore in 2002. Subsequently, he completed an MD in General Medicine from Mysore Medical College, Mysore. He further pursued his Senior Residency and Post-Doctoral Fellowship in Diabetology, enhancing his understanding of diabetic kidney disease. He later completed a DNB in Nephrology, with extensive training at Manipal Hospitals. He also earned a Certification in Clinical Nephropathology from the International Society of Nephrology (ISN-ANIO), enabling precise diagnosis and treatment of

complex kidney disorders. His special interests include kidney transplantation, particularly for chronic kidney disease patients and sensitised recipients. Dr. Deepesh is highly skilled in evaluating and managing transplant recipients throughout the pre-transplant, surgical, and post-transplant phases. He collaborates closely with multi-disciplinary teams to ensure optimal graft function and long-term patient care. His dedication to early detection and management of progressive renal conditions helps patients preserve kidney function and delay the need for dialysis or transplant. Dr. Deepesh is also proficient in performing interventional nephrology procedures such as USG-guided renal biopsy, temporary and tunnelled dialysis catheters (including Permcath) placement, and peritoneal dialysis catheter insertions. He expertly manages patients on various renal replacement therapies, including hemodialysis, hemodiafiltration, continuous renal replacement therapy (CRRT), and peritoneal dialysis. With a strong foundation in internal medicine and diabetes, Dr. Deepesh offers integrated care for patients with diabetic nephropathy. He adopts a comprehensive model involving medical therapy, lifestyle counselling, and long-term follow-up to slow disease progression and enhance quality of life. Dr. Deepesh is known for his clinical acumen and compassionate care, and is actively involved in patient education, counselling, and personalised care planning. His empathetic approach makes him a trusted figure among patients and their families, particularly in navigating complex treatment decisions and chronic illness management. Dr. Deepesh speaks Hindi, English, Kannada, Malayalam, and Tamil, ensuring effective and culturally sensitive communication with patients from diverse linguistic backgrounds.
