

**DR. H. S. SACHIN**

Consultant - Radiation Oncology

**Qualification**

MBBS | MD

## Overview

Dr. H. S. Sachin is an experienced radiation oncologist in Kanakapura Road, Bangalore, holding over 13+ years of experience. Dr. Sachin is currently practising as a Consultant – Radiation Oncology at Manipal Hospitals Kanakapura Road, where he brings his expertise in advanced radiation therapy techniques and a strong commitment to patient-centred cancer care. Throughout his career, Dr. Sachin has been known for his academic excellence, clinical precision, and innovative contributions to developing radiation oncology services for cancers of the head & neck, breast, and gynaecological malignancies. A gold medallist during his schooling and medical education, Dr. Sachin pursued MBBS from Mysore Medical College and Research Institute, graduating in 2010. His passion for oncology led him to the Tata Memorial Centre, Mumbai, where he completed his MD in Radiotherapy. His training exposed him to the entire spectrum of cancer management and equipped him with advanced skills in external beam radiation therapy, brachytherapy, and emerging modalities like Stereotactic radiosurgery (SRS), stereotactic body radiotherapy (SBRT), image-guided radiation therapy (IGRT), volumetric modulated arc

therapy (VMAT), and both 2D and 3D conformal techniques. Dr. Sachin expanded his experience through roles at leading oncology centres across India. He worked on high-volume cases and honed his skills in modern radiation planning and execution, contributing to multidisciplinary cancer care programmes. Dr. Sachin’s professional interests lie in advanced radiation oncology techniques and precision therapy. His proficiency in brachytherapy, including intracavitary, interstitial, intraluminal, and surface mould techniques, has enabled him to deliver personalised treatments for a wide variety of cancers. Alongside his clinical work, Dr. Sachin has consistently contributed to research and academic discussions. He has published in the Indian Journal of Palliative Care and worked on several projects during his tenure at Tata Memorial Hospital. He has also been a speaker and panellist at state-level and national oncology conferences, where he shares his expertise on the latest developments in radiation oncology. Dr. Sachin’s achievements extend beyond clinical practice. His vision combines medical excellence with systemic improvements, reflecting his belief in holistic progress in cancer care.
