

DR. CHANDRAKANT LAHANE

Consultant - Hemato Oncologly

Qualification

MBBS | MD (Medicine) | DNB (Clinical Haematology)

Overview

Dr. Chandrakant Lahane is a distinguished Hemato Oncologist in Pune with 9 years of extensive clinical experience, holding qualifications including MBBS, MD (Medicine), and DNB (Clinical Haematology). Specialising in both benign and malignant haematological disorders, he excels in managing complex conditions such as anaemia, bleeding and coagulation abnormalities, platelet disorders, leukemia, lymphoma, myeloma, and other hematologic malignancies. His expertise extends to hemoglobinopathies like sickle cell disease and thalassemia, as well as thrombotic disorders including deep vein thrombosis (DVT) and pulmonary embolism (PE). A key pillar of his practice is bone marrow transplantation, where he is skilled in performing both autologous and allogeneic procedures, ensuring optimal outcomes for patients with blood cancers and related disorders. Dr Lahane routinely performs critical interventions, including bone marrow biopsy and aspiration, lumbar puncture with intrathecal chemotherapy, central line/chemo port insertion, and PICC line placement. He adeptly manages leukaemia (acute and chronic), lymphoma diagnosis and treatment, multiple myeloma, and administers chemotherapy for solid tumours

and blood cancers, alongside targeted therapy, immunotherapy, and supportive oncology care, including transfusions and infection management. Fluent in Hindi, English, and Marathi, Dr. Lahane communicates effectively with diverse patient populations, fostering trust through his compassionate conduct, pragmatic approach, strong listening skills, and decisive decision-making. Patients and staff consistently provide positive feedback, praising his sincerity and dedication. Committed to lifelong learning, he actively participates in seminars and events, staying abreast of the latest trends and technologies in haemat-oncology. Dr. Lahane's holistic patient-centred care integrates advanced treatments with empathetic support, making him a trusted leader in managing haematological diseases and enhancing survival rates while prioritising quality of life.
