

DR. ANIRUDDHA KUNDU

Associate Consultant - Neurology

Qualification

MBBS (Hons) | MD (General Medicine) | DrNB (Neurology)

Overview

Dr. Aniruddha Kundu is an associate consultant neurologist at Manipal Hospitals Mukundapur. With a distinguished academic background of MBBS (Hons), MD (General Medicine) and DrNB (Neurology), Dr. Aniruddha Kundu is well-versed in the treatment and management of various anomalies concerning the neurological system. Over the tenure of his practice, Dr. Aniruddha Kundu has been associated with several notable healthcare establishments, including the Institute of Neurosciences, Kolkata and Calcutta National Medical College & Hospital, which provided him with extensive, hands-on experience. He specialises in diagnostics and treatment procedures for a broad range of neurological concerns, such as ischemic and haemorrhagic strokes, thrombolysis, post-stroke care, as well as epilepsy (status epilepticus and non-convulsive status epilepticus). His expertise further extends towards neuromuscular complications, movement disorders, demyelinating and neuroinfectious diseases. Beyond his clinical acumen, Dr. Aniruddha Kundu is an associate member of the Indian Academy of Neurology (IAN), and is an active researcher - all of which is evident of him being at the forefront of medical advancements. With

an approach focusing on quality-driven, protocol-based care, Dr. Aniruddha Kundu ensures ethical healthcare practices, compassionate communication and patient safety.
