

DR. VIPIN KAVERAPPA P T

Consultant – Nephrology and Kidney Transplant Physician

Qualification

MBBS | MD (Internal Medicine) | DNB (Nephrology)

Overview

Dr. Vipin Kaverappa is an experienced nephrologist in Mysuru. He is currently practicing as a Consultant – Nephrology and Kidney Transplant Physician at Manipal Hospitals Mysuru. With about ten years of experience in nephrology, Dr. Kaverappa has extensive expertise in treating various kidney-related conditions and managing complex renal cases. His practice focuses on patient-centered care, emphasizing preventive care alongside advanced diagnostic and treatment techniques for kidney health. Dr. Kaverappa's journey in medicine began with an MBBS from Kasturba Medical College, Manipal University, Mangalore, followed by a compulsory rotating internship where he gained exposure to multiple medical disciplines. Throughout his career, Dr. Kaverappa has refined his skills in general nephrology, hemodialysis, peritoneal dialysis, and kidney transplantation, including complex procedures such as ABO-incompatible and HLA-sensitised transplants. His dedication to professional development is further demonstrated by his numerous research publications on topics such as chronic kidney disease, secondary hyperparathyroidism, and renal biopsies. At Manipal Hospitals Mysuru, Dr. Kaverappa is involved in

leading nephrology services and is proficient in performing ultrasound-guided percutaneous renal biopsies, including transplant kidney biopsies and tunneled catheter placements for dialysis access. He regularly provides comprehensive care for patients requiring dialysis and those with acute and chronic kidney disease. Dr. Kaverappa's commitment to preventive nephrology is evident in his approach to educating patients on managing kidney health and understanding the importance of early intervention. Dr. Kaverappa has also pioneered the renal transplant program at his previous institutions, demonstrating his ability to successfully establish and manage dialysis departments. Under his leadership, the transplant program has seen significant success, with several kidney transplants completed, including procedures for COVID-19-positive recipients and ABO-incompatible transplants during the pandemic. An advocate for organ donation and active in promoting awareness of kidney health, Dr. Kaverappa has been part of various professional societies and forums in nephrology, where he has presented his research and clinical findings. His scholarly contributions include multiple national and international publications on nephrology, as well as active participation in conferences on renal health. Dr. Vipin Kaverappa is fluent in Kannada, English, and Hindi, allowing him to effectively communicate with a diverse range of patients and their families, further enhancing his patient-centered approach to nephrology.
