

DR. RAEESA TANVEER

Consultant - Obstetrics & Gynaecology

Qualification

MBBS | DGO (OBG) | DNB (OBG)

Overview

Dr. Raeesa Tanveer is a skilled and surgically adept obstetrician and gynaecologist in Mysuru with expertise in high-risk pregnancy care and minimally invasive gynaecological procedures. She is currently practising as a Consultant in Obstetrics & Gynaecology at Manipal Hospital, Mysore, with clinical experience in managing complex obstetric and gynaecological conditions using a structured, evidence-based approach. Dr. Tanveer completed her MBBS and DGO from Mysore Medical College and Research Institute, followed by a DNB in Obstetrics & Gynaecology from Apollo BGS Hospital, Mysore. Her training is further strengthened by advanced fellowships, including FMAS and DMAS in Minimal Access Surgery, a Fellowship in Assisted Reproductive Technology (ART), and a Robotic Surgery Fellowship from World Laparoscopic Hospital. This comprehensive training enables her to manage both routine and complex cases across obstetrics, gynaecology, and reproductive medicine. In clinical practice, Dr. Tanveer is actively involved in the management of high-risk pregnancies, including cases complicated by medical disorders, obstetric risks, and previous pregnancy complications. She performs

operative vaginal deliveries and cesarean sections, ensuring safe maternal and neonatal outcomes through timely clinical decision-making. Her consistent approach to high-risk obstetric care has established her as one of the best gynaecologists in Mysuru. Her scope of work also includes laparoscopic and minimally invasive gynaecological surgeries, where she performs and assists procedures such as hysterectomy (abdominal, vaginal, and laparoscopic), polypectomy, dilation and curettage, and other uterine interventions. Dr. Raeesa Tanveer also specialises in infertility management and assisted reproductive techniques, offering structured evaluation and treatment planning for couples facing reproductive challenges. Her expertise in ART, combined with her clinical understanding of hormonal and structural factors, enables comprehensive fertility care tailored to individual patient needs. This integrated approach positions her among the best gynaecologists in Mysuru for infertility and reproductive health management. In addition, she is experienced in managing a wide range of gynaecological conditions, including menstrual disorders, cervical pathologies, and uterine abnormalities. She performs essential diagnostic and therapeutic procedures such as cervical biopsy, endometrial sampling, IUCD insertion and removal, and minor operative interventions, ensuring continuity of care from diagnosis to treatment. Her academic contributions include a case presentation on carcinoma cervix at a postgraduate teaching programme and a thesis on fetomaternal outcomes with and without epidural labour analgesia, reflecting her engagement with clinical research and evidence-based practice. She is a life member of FOGSI, the Mysore Obstetrics and Gynaecological Society, and the Indian Medical Association, indicating her active involvement in professional development and clinical updates. Fluent in Kannada, English, and Hindi, Dr. Raeesa Tanveer ensures clear communication and patient understanding during consultations. At Manipal Hospital Mysore, she provides structured and patient-focused care across obstetrics, gynaecology, and infertility, combining clinical precision with a balanced approach to women’s

health.
