

DR. SATWANT SACHDEVA

Senior Consultant - Neurology

Qualification

MBBS | MD | DM

Overview

Dr. Satwant Sachdeva, the top neurologist in Patiala, has more than 32 years of extensive experience in Neurology. He graduated from Punjabi University in 1972 and then completed a Diploma in Chest & Tuberculosis from Punjabi University Medical College in 1982 and completed his Post Graduation in Internal Medicine from Punjabi University - PGIMER Chandigarh in 1986. He also completed Post Graduation in Neurology from PGIMER Chandigarh in 1990. His expertise includes Stroke, Epilepsy, Parkinson's Disease, Migraine, Dementia, Persistent Headache, Neuro-infections and Neuromuscular Disorders. In addition to clinical excellence, he has also contributed academically and has appeared in the media for talks on various topics. He was featured in India Times for his article titled ‘Impact of Alzheimer's disease on the overall nervous system’ and on The Health Site, Zee Digital for an article titled ‘Is that a tumour in your brain? 5 often ignored risk factors of a brain tumour’ on World Brain Tumor Day. Dr. Satwant is fluent in Hindi, English and Punjabi. He ensures that the communication with his patients is transparent and they are not confused or unclear about any aspect of the treatment. He educates

them about the procedure and guides them in their post-treatment journey. Dr. Sachdeva is amongst the best neurologists in Patiala. Dr. Satwant consistently strives to provide the best care possible for the patients, in sync with the mission and ethos of Manipal Hospital. He also preserves confidentiality and impartiality at all times. All of this displays his real professionalism and dedication to his job, which has earned him praise from each and every one of his patients. At Manipal Hospitals Patiala, he is constantly committed to delivering top-notch medical care. Along with his clinical expertise, Dr. Sachdeva actively attends seminars and events on a national and worldwide level that discuss the most recent developments in technology in the medical industry.
