

DR. ATUL GUPTA

Consultant - Urology

Qualification

MBBS | MS (General Surgery) | M.Ch (Urology)

Overview

Dr Atul Gupta is a highly accomplished Consultant Urologist with advanced training in urology and a strong focus on delivering precise, patient-centred care. He holds an M.Ch in Urology from Narayana Medical College and Hospital, Nellore, where he gained extensive exposure to high-volume urological procedures, particularly in endourology and renal transplantation. He also completed his M.S. in General Surgery from Gajraraja Medical College, Gwalior, and his MBBS from Mahatma Gandhi Memorial Medical College, Indore, building a robust foundation in surgical sciences. Dr Gupta specialises in a wide spectrum of urological conditions, with particular expertise in minimally invasive and laser-assisted procedures. He is highly skilled in the management of kidney, ureteric, and bladder stones using advanced techniques such as PCNL, URS, and RIRS with laser technology. His proficiency extends to prostate surgeries, including TURP and laser-based procedures like ThuLEP, ensuring effective and faster recovery for patients. In addition to adult urology, Dr Gupta has significant experience in paediatric urology, treating conditions such as hypospadias, vesicoureteral reflux, posterior urethral valves, and

undescended testes. His expertise in reconstructive urology includes urethral stricture disease management through advanced procedures like urethroplasty and endourethroplasty. He is also skilled at managing female urological conditions, including urinary incontinence, vesicovaginal fistula, and cystocele. He has performed and assisted in over 400 endourological procedures and is experienced in handling complex urological trauma and emergencies. An active member of the Urological Society of India and the South Zone Urological Society of India, Dr Gupta regularly participates in academic forums and has presented papers at national and state conferences. With strong technical expertise in laser systems, advanced imaging, and urodynamics, Dr Atul Gupta is committed to achieving optimal outcomes through innovation, precision, and compassionate care, while maintaining excellent communication, empathy, teamwork, professionalism, and a patient-first approach at all times. This allows him to deliver ethical, reliable, and patient-focused clinical care consistently.
