

DR. SATADRU ROY

Associate Consultant - Surgical Oncology

Qualification

BDS | MDS | Fellowship in Oral Oncosurgery | HBNI Fellowship in Oral Oncology & Reconstructive Surgery

Overview

Dr. Satadru Roy is a Junior Consultant in Surgical Oncology at Manipal Hospital, Rangapani, specializing in oral cancers, maxillary cancers, jaw tumors, oral premalignant diseases, and reconstructive surgery. With a strong academic foundation, he completed his BDS in 2014, followed by an MDS in 2018, and further honed his expertise with a Fellowship in Oral Oncosurgery (2020) and an HBNI Fellowship in Oral Oncology & Reconstructive Surgery (2022). His advanced training enables him to provide comprehensive care for patients with complex oral malignancies, focusing on both oncological treatment and functional restoration. Dr. Roy has established himself as a leading expert in surgical oncology, particularly in managing oral and maxillofacial tumors. His proficiency in reconstructive surgery allows patients to regain both aesthetics and functionality post-surgery, ensuring an improved quality of life. He was honored with the First Prize for his paper titled “Pyogenic Granuloma – An Enigma for Centuries and Still Counting” at the 49th Annual IDA Conference of the West Bengal State Branch. Additionally, his Teaching Module on “Infection Control in Dentistry and Operatory Asepsis” earned him the First Prize at the

International Conference on Oral Health and Well-Being. Dr. Roy received the First Prize for his poster on “Techniques for Identification of the Facial Nerve during Parotid Gland Surgery” at the 6th Annual Conference of AOMSI Karnataka State Chapter. As a passionate oncologist and reconstructive surgeon, Dr. Roy stays at the forefront of medical advancements, integrating techniques and evidence-based practices in his surgical interventions. His expertise in oral premalignant diseases allows him to intervene at the earliest stages, significantly improving prognosis and survival rates. Whether treating oral cancers, jaw tumors, or maxillary malignancies, his dedication to excellence ensures that his patients receive personalized treatment according to their needs.
