

DR. J. PRAVEEN SINGH PETER

Consultant – Neurology

Qualification

MBBS | MD | DM (Neuro)

Overview

Dr. J. Praveen Singh Peter is an experienced neurologist in Salem. He is currently practising as a Consultant – Neurology at Manipal Hospital Salem. With six years of experience in neurology practice, Dr. Praveen has gained a strong reputation for his expertise in diagnosing and treating a wide spectrum of neurological disorders. His clinical work focuses on providing precise and compassionate care to patients living with complex neurological conditions, including seizures, stroke, migraine, neuropathies, and cognitive impairments. He is a leading Neurologist in Salem. Dr. Praveen's academic foundation is rooted in some of Tamil Nadu's well-recognised medical institutions. He pursued his undergraduate medical degree (MBBS) at Madurai Medical College, where he first developed an interest in neurosciences. His curiosity about the brain, nerves, and human cognition guided his decision to specialise further, leading him to complete an MD in General Medicine at Tirunelveli Medical College. Building upon this, he pursued a DM in Neurology at the same institution, where he gained advanced training in both clinical and interventional neurology. This rigorous academic journey has provided him with the knowledge and practical expertise

necessary to handle diverse neurological challenges. As a neurologist, Dr. Praveen has particular proficiency in the management of seizure disorders, including epilepsy. He combines modern diagnostic tools with personalised treatment strategies to help patients control seizures, reduce complications, and improve quality of life. He also specialises in stroke management, an area where timely diagnosis and intervention can make a crucial difference. His approach emphasises early detection, evidence-based treatment, and rehabilitation support to optimise patient outcomes. Another area of his expertise is the treatment of painful neuropathies. These conditions, which involve damage or dysfunction of peripheral nerves, often cause significant pain, weakness, and functional disability. Dr. Praveen's comprehensive management strategies include both pharmacological and non-pharmacological approaches tailored to each patient's individual needs. His ability to address such chronic conditions with patience and empathy has made him a trusted physician among patients who require long-term neurological care. In addition, Dr. Praveen has extensive experience in treating migraine and other chronic headache disorders. Migraines can severely disrupt daily life, and his approach focuses on accurate diagnosis, preventive strategies, lifestyle modification, and advanced therapies to provide lasting relief. He also has a strong clinical interest in cognitive impairment and dementia, where he works closely with patients and their families to create supportive care plans that address memory decline, behavioural changes, and functional limitations. At Manipal Hospital, Dr. Praveen Singh Peter is part of a multidisciplinary team that includes specialists in neurosurgery, rehabilitation, cardiology, and internal medicine. This collaborative approach allows him to design holistic treatment plans that consider not only the neurological condition but also the patient's overall health and well-being. His ability to coordinate with other experts ensures seamless and comprehensive care, whether a patient is recovering from a stroke, undergoing treatment for epilepsy, or managing progressive neurological disease.
