

DR. ATINDRIYA BISWAS

Consultant - Laparoscopic General & G.I. Surgery

Qualification

MBBS | MS (Gen Surgery) | MRCS (RCS, EDIN) | FRCS (RCS, England)

Overview

Dr. Atindriya Biswas is a highly accomplished Consultant in Laparoscopic General and Gastrointestinal Surgery associated with Manipal Hospital Salt Lake, with extensive clinical, academic, and international experience spanning over two decades. Holding prestigious qualifications including MBBS (Hons, Medal), MS (Medal), MRCS (Edinburgh), FRCS (England), and FEBS (European Board of Surgery), he is recognized for his expertise in advanced laparoscopic surgery, gastrointestinal surgery, colorectal surgery, and surgical oncology. Dr. Biswas spent nearly 15 years in the United Kingdom, where he underwent rigorous surgical training and served as a Consultant General and Colorectal Surgeon at renowned institutions such as Royal Derby Hospital and Diana Princess of Wales Hospital. During his tenure in the UK, he independently performed a large number of complex laparoscopic colorectal procedures and endoscopic interventions, establishing himself as a skilled minimally invasive surgeon. He also completed an advanced fellowship in Laparoscopic Colorectal Oncosurgery, gaining expertise in complex colorectal resections, total colectomies, anterior resections, abdominoperineal

resections, and transanal endoscopic microsurgery. After returning to India, Dr. Biswas has been associated with several leading healthcare institutions, including Apollo Gleneagles Hospital, Tata Medical Center, AMRI Hospitals, Ruby General Hospital, and currently serves as a Senior Consultant Surgeon at HP Ghosh Hospital and Neotia Hospital, New Town. His practice encompasses advanced laparoscopic procedures, gastrointestinal surgeries, colorectal surgery, GI oncology, endoscopy, colonoscopy, and single-incision laparoscopic surgery (SILS), with additional exposure to robotic surgery. A dedicated academician and researcher, Dr. Biswas has authored multiple publications in reputed international journals and has presented his work at prestigious global surgical conferences. His research interests include colorectal cancer, laparoscopic surgery, liver metastasis management, diagnostic laparoscopy, and innovations in surgical techniques. His contributions have significantly influenced clinical practice and patient care pathways in gastrointestinal surgery. Beyond clinical excellence, Dr. Biswas is deeply committed to medical education and surgical training. For over 20 years, he has mentored medical students, junior doctors, and surgical fellows, with formal training in teaching and supervisory skills. His patient-centric approach, combined with international expertise and a strong academic foundation, has earned him a reputation as one of the leading laparoscopic and GI surgeons in the region.

Field of Expertise

- General Surgery
- Laparoscopic Surgery
- GI & Colorectal Surgery
- Hernia & Gallbladder Surgery
- Piles, Fissure & Fistula Treatment
- Thyroid & Breast Surgery
- Bariatric Surgery

Awards & Achievements

- Awarded multiple distinctions and medals during MBBS and MS training for outstanding academic performance.
- Received the Medal for Proficiency in Research from the Institute of Post Graduate Medical Education & Research (IPGMER), Kolkata.
- Conferred with the prestigious Fellowship of the Royal College of Surgeons (FRCS), England.
- Earned Fellowship of the European Board of Surgery (FEBS), reflecting excellence in surgical practice and expertise.
- Trained and practiced in the United Kingdom for nearly 15 years, gaining extensive international experience.
- Served as an independent Consultant Colorectal Surgeon in the UK healthcare system.
- Completed advanced fellowship training in Laparoscopic Colorectal Oncosurgery.
- Recognized for expertise in minimally invasive gastrointestinal and colorectal surgery.
- Over 20 years of experience in teaching, training, and mentoring surgical trainees and young surgeons.
- Contributed significantly to the advancement of laparoscopic and minimally invasive GI surgery through clinical practice and academic involvement.
- Internationally trained surgeon with a strong focus on evidence-based, patient-centered surgical care.

- Known for combining clinical excellence, research proficiency, and surgical education leadership.

Talks & Publications

- Published multiple peer-reviewed research papers in reputed international surgical journals.
- Research interests include colorectal surgery, gastrointestinal oncology, minimally invasive surgery, and hepatobiliary diseases.
- Authored studies on the prevention of parastomal hernia and innovations in colorectal surgical care.
- Contributed research on embryonic stem cells and their potential clinical applications.
- Published work on pancreatic cystic neoplasms and complex pancreatic disorders.
- Conducted research on heterotopic pancreas and other rare gastrointestinal conditions.
- Investigated the role and effectiveness of diagnostic laparoscopy in surgical decision-making.
- Presented research at the International Hepato-Pancreato-Biliary Association (IHPBA) World Congress.
- Presented scientific papers at the European Society of Coloproctology (ESCP) meetings.
- Shared research findings at the Association of Surgeons of Great Britain and Ireland (ASGBI) conferences.
- Contributed to advancing clinical pathways in colorectal cancer management.
- Supported improvements in the staging and management of liver metastases through research.
- Promoted the adoption of advanced laparoscopic and minimally invasive surgical techniques.

- Recognized for a strong commitment to evidence-based practice, clinical innovation, and surgical research excellence.
