

DR. GOPAL ACHARI

Consultant - Neurosurgery

Qualification

MBBS | MS (GEN SUR) | MCH (NEURO SUR)

Overview

Dr. Gopal Achari is a highly experienced neurosurgeon with over two decades of expertise in the diagnosis and management of complex brain and spine disorders at Manipal Hospital, Saltlake. Trained in neurosurgery (MCh) from SGPGI, Lucknow, he has received specialised training in microneurosurgery with a focused interest in vascular and skull base surgery. Over the years, he has been associated with leading super-speciality institutions across India. Dr. Achari has built a strong reputation for delivering comprehensive and patient-centric care across a wide spectrum of neurological conditions. His clinical expertise spans common disorders such as headaches, migraines, seizures, and vertigo, as well as complex conditions including brain tumours, spinal cord injuries, and Parkinson’s disease. He is known for utilising advanced diagnostic techniques to accurately identify the root cause of neurological symptoms and design personalised treatment plans tailored to individual patient needs. In addition to his clinical practice, Dr. Achari is actively involved in advanced neurosurgical procedures, including surgeries for acoustic tumours, meningiomas, and pituitary disorders. His approach integrates precision-driven

surgical techniques with a strong emphasis on safety and long-term outcomes. His association with multidisciplinary teams at leading institutions further enhances the quality of care provided to patients requiring complex neuro and spine interventions. The platform India Brain Spine Surgery reflects this commitment by offering specialised services in brain and spine disorders, covering conditions such as back pain, neck pain, and other neurological diseases. It highlights a patient-focused approach that combines expertise, advanced surgical capabilities, and accessible care pathways for individuals seeking treatment in India. Overall, Dr. Gopal Achari stands out for his blend of surgical expertise, compassionate care, and commitment to clinical excellence, making him a trusted name in neurosurgery for both domestic and international patients seeking advanced brain and spine treatment. His dedication to innovation and continuous learning further strengthens outcomes and patient satisfaction across diverse and challenging neurological cases.
