

DR. SAURODIP MAITY

Consultant - Paediatrics Intensive Care

Qualification

MBBS | DNB | Indian Diploma in Pediatric Critical Care Medicine |
Fellowship in Pediatric Intensive Care (UK)

Overview

Dr. Saurodip Maity is a highly skilled paediatric intensivist in Manipal Hospital, Varthur Road. He is currently practising as a Consultant - Paediatric Intensive Care at Manipal Hospital Varthur Road, Bangalore, where he provides advanced critical care support for infants, children, and adolescents facing medical, surgical, and cardiac emergencies. With robust training in India and the UK, and hands-on experience in some of the most demanding paediatric intensive care environments, he is widely regarded as one of the best paediatric intensivists in Varthur for children requiring specialised, multidisciplinary, and high-dependency critical care. Dr. Saurodip is known for his calm decision-making, rapid clinical response in high-pressure situations, and an empathetic approach that reassures parents during their most difficult moments. His academic journey began at the prestigious Medical College, Kolkata, the oldest medical college in Asia, where he completed his MBBS. He went on to pursue DNB Paediatrics at the P. D. Hinduja National Hospital in Mumbai, one of the country's leading centres for paediatric training. His dedication towards paediatric critical care led him to secure the Indian Diploma in Paediatric Critical Care

Medicine (IDPCCM), followed by a specialised Fellowship in Paediatric Intensive Care in London, UK. This deeply enriched his expertise in handling complex paediatric ICU cases, advanced ventilation, cardiac critical care, and emergency paediatric stabilisation with globally aligned standards. His clinical experience is marked by exposure to diverse, high-acuity paediatric critical care settings. As a Senior Clinical Fellow in the Paediatric and Cardiac Intensive Care Units in London, he trained at an internationally recognised centre known for paediatric cardiac and respiratory care excellence. Prior to joining Manipal Hospital Varthur as a Consultant, he served in PICUs of established tertiary hospitals, where he managed some of the most challenging cases involving multi-organ dysfunction, severe infections, post-surgical recovery, ECMO-supported care, paediatric transplants, and life-threatening emergencies. His ability to stabilise critically ill children with precision, compassion, and sound clinical reasoning has earned him strong trust among parents and peers, further strengthening his position as one of the best paediatric intensivists in Varthur for complex paediatric care. Dr. Saurodip's clinical interests include paediatric ECMO, paediatric transplants, high-risk transport of critically ill children, paediatric emergencies, point-of-care ultrasound, and paediatric cardiac intensive care. He is trained in advanced paediatric life support and has consistently upgraded his skills through specialised certifications in airway management, bronchoscopy, TB elimination protocols, and paediatric emergency care. His ECMO specialist training at the University of West London further enhances his capability to deliver advanced life-support care for children with severe cardiac and respiratory failure, an area where only a handful of paediatric intensivists are trained. His academic contributions include presentations at national and international paediatric conferences, including Child NeuroCon (India) and the International Child Neurology Conference in Turkey. He has authored and published work on rare neurological presentations in children and continues to remain active in research, reflecting his commitment to evolving paediatric critical

care standards. Dedicated to continuous professional growth, he is currently pursuing additional qualifications in Paediatric Pulmonology and Paediatric Sleep Medicine, further expanding his scope of holistic paediatric care. Dr. Saurodip is known for his warm rapport with children and deeply supportive counselling with families, particularly during critical illness, prolonged ICU stays, or emotionally challenging diagnoses. His approach combines clinical precision with humane communication, helping families feel informed, guided, and reassured throughout their child's treatment journey. His strong belief in multidisciplinary care, evidence-based medicine, and parental involvement in the care plan reflects his vision of building a child-centred, integrated model of paediatric critical care at Manipal Hospital Varthur Road. For families seeking reliable, specialised, and compassionate intensive care support, Dr. Saurodip stands as one of the best paediatric intensivists in Varthur to trust with a child's health during emergencies or complex clinical conditions.

Fellowship & Membership

- Life Member - Indian Academy of Paediatrics, IAP ICC
- Associate Member- Royal College of Pediatrics & Child health, UK

Field of Expertise

- Pediatric Intensive Care
- Pediatric Emergency
- Pediatric Advanced Life Support
- Pediatric Transplants & Cardiac Intensive Care
- Pediatric ECMO
- Point of Care Ultrasound
- Common Childhood Illnesses

- Childhood and Adolescent Vaccination
- Pediatric Pulmonology

Languages Spoken

- English
- Hindi
