

DR. VISHNUPRIYA V

Consultant – Pathology

Qualification

MBBS | MD - Pathology

Overview

Dr. Vishnupriya V is a detail-orientated and analytically driven pathologist in Varthur Road with expertise in diagnostic pathology and laboratory quality systems. She is currently practising as a Consultant – Pathology at Manipal Hospitals, Varthur Road, Bangalore, with several years of experience in comprehensive diagnostic evaluation across multiple domains of pathology. Dr. Vishnupriya completed her MBBS followed by an MD in Pathology, building a strong academic and practical foundation in laboratory medicine. Her work reflects a balance between diagnostic accuracy and systematic laboratory practices, particularly in handling complex and atypical cases that require careful morphological and clinical correlation. Her clinical expertise spans diagnostic haematology, cytopathology, histopathology, and clinical pathology, with a structured approach to interpreting laboratory findings in correlation with clinical presentation. She is involved in the microscopic evaluation of tissue and cytology samples, blood disorders, and a wide spectrum of pathological conditions, ensuring accurate and timely diagnoses. Her ability to integrate findings across laboratory disciplines contributes to precise disease identification and

clinical decision-making, positioning her among the best pathologists in Varthur Road for comprehensive diagnostic services. Her experience in diagnostic haematology includes evaluation of anaemias, leukaemias, and other haematological disorders through peripheral smear analysis, bone marrow studies, and advanced laboratory techniques. In cytopathology, she performs and interprets fine-needle aspiration cytology (FNAC) and other cytological examinations, contributing to early detection and disease characterisation. Her expertise in histopathology involves detailed tissue examination for inflammatory, infectious, and neoplastic conditions, supporting both routine and specialised diagnostic pathways. In addition to diagnostic responsibilities, Dr. Vishnupriya is actively involved in laboratory quality management and blood bank operations. She works within structured quality frameworks to maintain accuracy, standardisation, and compliance across laboratory processes. Her role includes ensuring adherence to established protocols, monitoring quality indicators, and supporting safe and efficient transfusion practices within the blood bank setting. Her academic contributions include publications in recognised journals. Her study on the histopathological spectrum of meningiomas, published in the Indian Journal of Pathology and Oncology, reflects her interest in tumour pathology and morphological analysis. She has also contributed to research on semen analysis and cytochemical staining techniques, published in the Journal of Pathology of Nepal, highlighting her engagement with evolving diagnostic methodologies in reproductive pathology. Fluent in English, Hindi, Tamil, Telugu, and Kannada, Dr. Vishnupriya ensures effective communication within multidisciplinary clinical teams and laboratory environments. Her approach remains structured, precise, and aligned with evidence-based diagnostic practices, making her the best pathologist in Varthur Road.

Field of Expertise

- Diagnostic Haematology
- Cytopathology
- Clinical Pathology
- Histopathology
- Laboratory Quality Management
- Blood Bank Management
