

DR. VENKATA KRISHNA SANDEEP

Consultant - ENT Head & Neck Surgery and Cochlear Implant Surgeon

Qualification

MBBS | MS (Manipal Gold Medalist) | DNB | FAGE | Fellowship in Ear Reconstruction (Pinnaplasty) - Japan | Fellowship in Sialendoscopy - Mumbai

Overview

Dr. Venkata Krishna Sandeep is a leading ENT and Head & Neck surgeon in Vijayawada with extensive experience in advanced ear, nose, throat, and skull base procedures. He is currently practising as a Consultant – ENT, Head & Neck Surgery and Cochlear Implant Surgeon at Manipal Hospital Vijayawada, with focused expertise in cochlear implantation, skull base surgery, sialendoscopy, and complex reconstructive ENT procedures. Recognised as one of the best ENT doctors in Vijayawada, Dr. Sandeep’s clinical work spans high-complexity surgical interventions and specialised hearing restoration programs. He has performed the highest number of skull base surgeries in the state of Andhra Pradesh, a domain that requires meticulous anatomical precision, multidisciplinary coordination, and advanced operative planning. Skull base procedures often involve intricate access to areas adjacent to the brain, cranial nerves, and major vascular structures, demanding refined surgical judgement and operative control. He has also performed the highest number of Mucor Mycosis (black fungus) surgeries in Andhra Pradesh, particularly during

periods when invasive fungal infections required urgent and extensive debridement to prevent life-threatening complications. These cases involve detailed sinus clearance, orbital evaluation, and close postoperative monitoring. His experience in such high-risk scenarios reflects structured surgical preparedness and familiarity with complex infection management. Dr. Sandeep established a full-fledged Cochlear Implant Program within the Manipal Hospitals group, strengthening hearing rehabilitation services for patients with severe to profound hearing loss. Cochlear implantation involves detailed audiological assessment, surgical electrode placement within the cochlea, and long-term auditory rehabilitation. His role in initiating and expanding this program underscores his commitment to comprehensive hearing correction strategies. His expertise in correcting hearing impairment further contributes to his standing among the best ENT doctors in Vijayawada, particularly for advanced ear and hearing-related procedures. He also introduced sialendoscopy surgery for the first time in Andhra Pradesh. Sialendoscopy is a minimally invasive technique used to diagnose and treat salivary gland disorders such as ductal obstruction and chronic sialadenitis. The procedure requires endoscopic navigation within delicate salivary ducts, allowing stone removal and ductal management without extensive external incisions. In addition to reconstructive and functional surgeries, Dr. Sandeep is trained in cosmetic ENT procedures such as Rhinoplasty (nose reshaping) and Pinnaplasty (ear reconstruction). His Fellowship in Ear Reconstruction (Pinnaplasty) from Japan reflects dedicated training in aesthetic and reconstructive ear surgery. He also holds a Fellowship in Sialendoscopy from Mumbai, further strengthening his minimally invasive salivary gland expertise.

Fellowship & Membership

- Fellowship in Ear Reconstruction (Pinnaplasty) - Japan.
- Fellowship in Sialendoscopy - Mumbai.
