

DR. V B PRAVEEN NAIDU

Consultant - Diabetes and Endocrinology

Qualification

MBBS | MRCP | MRCP Endocrinology | CCT in Diabetes & Endocrinology and General Internal Medicine

Overview

Dr. V B Praveen Naidu is a highly qualified and experienced doctor specialising in Diabetes and endocrinology, and General Internal Medicine. With an extensive educational background and a diverse range of professional experiences, Dr. Naidu has honed his expertise in providing comprehensive medical care to patients. With a career spanning several prestigious institutions in the UK and India, he has developed expertise in the diagnosis, treatment, and management of various endocrine disorders and general medical conditions. Dr. Naidu is known for his commitment to patient care and his emphasis on primary and secondary prevention of cardiovascular diseases and the resolution of diabetic foot ulcers, making him the best Endocrinologist in Vijayawada. Dr. Naidu's journey began with his MBBS degree from Osmania Medical College in Hyderabad, India. He then embarked on his specialist training in the UK, starting with core medical training and foundation training. During this period, he gained exposure to various medical disciplines, including respiratory medicine, cardiology, gastroenterology, oncology, and haematology. After completing his foundation training, Dr Naidu secured a Trust Registrar and LAT

position at Blackpool Victoria Hospital, where he focused on Diabetes and Endocrinology. This role demonstrated his commitment to specialising in Endocrinology, leading to his acceptance into the training program. Dr. Naidu underwent specialist registrar training in Diabetes and Endocrinology within the Severn Deanery, further refining his skills and knowledge. He rotated through several renowned institutions, including Weston General Hospital, Southmead Hospital, Royal United Hospital, Bristol Royal Infirmary, Great Western Hospital, and Blackpool Victoria Hospital. These placements provided him with extensive experience in managing various endocrine disorders, including diabetes, thyroid conditions, pituitary disorders, and adrenal problems. He actively participated in specialist clinics, foot clinics, antenatal clinics, and endocrine dynamic testing. Additionally, he gained valuable experience in general medicine through his participation in GIM on-call rotations and ward management. Dr. Naidu has also pursued additional courses and workshops to enhance his skills and expertise. He has completed training in NETS Basics, YDEF Pump Technology, teaching the teachers, leadership skills, resuscitation (ALS), clinical skills, and critical appraisal. These courses have equipped him with the necessary tools to deliver high-quality patient care and stay abreast of advancements in his field.
