

DR. BHARATHI HOSDURG

Consultant - Anesthesiology

Qualification

MBBS | DNB Anaesthesia

Overview

Dr. Bharathi Hosdurg is an experienced anaesthesiologist in Bangalore, currently practising as a Consultant – Anaesthesiology at Manipal Hospital Whitefield. Dr. Bharathi brings over 15+ years of expertise in anaesthetic management across a wide range of surgical specialities, ensuring patient comfort and safety during perioperative care. Whether managing high-risk patients or offering effective pain relief during labour and delivery, Dr. Bharathi is committed to ensuring patient safety and comfort. With an MBBS and DNB in Anaesthesia, Dr. Bharathi has developed a deep proficiency in general anaesthesia, regional anaesthesia techniques, and advanced pain management strategies. Her career spans diverse clinical settings, including general surgery, obstetrics, orthopaedics, neurosurgery, cardiac interventions, and critical care procedures. She works with precision and empathy, tailoring each anaesthetic plan to the individual needs, medical history, and surgical requirements of her patients. At Manipal Hospital Whitefield, Dr. Bharathi Hosdurg plays a key role in multidisciplinary surgical teams, contributing to both routine and complex procedures. Her specialisation includes the administration of general anaesthesia

and regional anaesthesia, such as spinal and epidural blocks. She also holds expertise in performing a variety of peripheral nerve blocks that aid in both intraoperative anaesthesia and postoperative analgesia for orthopaedic, abdominal, and thoracic surgeries, ensuring faster recovery and reduced opioid requirements. Dr. Bharathi has a strong clinical interest in managing complex airways and utilising specialised intubation techniques, including those involving Bonfils intubation. Her academic contribution on this topic, “Comparison of Haemodynamic Responses to Intubation Using Bonfils Laryngoscope and Macintosh Laryngoscope”, was published in the Karnataka Journal of Anaesthesia. She also co-authored rare and complex case studies, including anaesthesia management for Hydrolethalus syndrome and an epidural blood patch in a patient with subdural haematoma—both featured in reputed anaesthesia journals. Dr. Bharathi Hosdurg is a respected member of the Indian Society of Anaesthesia and continuously engages in knowledge-sharing and academic forums. Her scientific approach to anaesthesia, backed by clinical experience and evidence-based practice, ensures that patients receive optimal care grounded in the latest medical advancements. Dr. Bharathi speaks English, Kannada, Tamil, Hindi, Telugu, Tulu, and Malayalam, enabling her to communicate compassionately and effectively with patients from diverse linguistic and cultural backgrounds.

Fellowship & Membership

- Member of Indian society of anesthesia
- A comparison of haemodynamic responses using Bonfils intubation and normal laryngoscopy published in the Karnataka journal of anesthesia in 2015.
- Anaesthesia for Hydrolethalus syndrome - a rare case.published in Indian journal of anesthesia in the year 2017.
- Epidural blood patch for a case of subdural haematoma - sent to ija .

Field of Expertise

- General anesthesia.
- Various blocks used for anesthesia and analgesia.
- Various types of regional anesthesia including spinal and epidurals.

Languages Spoken

- English
- Kannada
- Tamil
- Hindi
- Telugu
- Tulu
- Malayalam

Awards & Achievements

- Presented papers at KISACON Bangalore 2014
- Presented papers in paediatric anesthesia conference in 2014 at Goa.
