

DR. ASIFA KHALID

Lead Consultant - Dental Science

Qualification

BDS | Dip. in Endodontics

Overview

Dr. Asifa Khanum is a highly skilled endodontist and general dentist in Yelahanka, currently practising as a Lead Consultant- Dental Sciences at Manipal Hospital Yelahanka, Bangalore. With nearly two decades of experience in comprehensive dental care and advanced endodontic treatments, she brings both precision and compassion to every aspect of her clinical practice. Known for her expertise in restorative dentistry, cosmetic procedures, and endodontic interventions, she has earned a reputation as one of the best endodontists in Yelahanka, dedicated to improving oral health and enhancing patient confidence through personalised, evidence-based treatment. Dr. Asifa Khanum completed her Bachelor of Dental Surgery (BDS) from the Bangalore Institute of Dental Sciences under the Rajiv Gandhi University of Health Sciences. Her keen interest in root canal therapy and restorative procedures led her to pursue a specialised certification in Endodontics from the National Institute of Clinical Endodontics, where she honed her skills in both conventional and rotary endodontic systems. Over the years, she has cultivated a refined approach to managing complex dental cases, combining clinical expertise with an empathetic understanding of

patient comfort and aesthetics. Throughout her extensive clinical journey, Dr. Asifa has worked with a diverse patient base, delivering high-quality dental care across all age groups. Her areas of expertise include root canal treatments, restorative procedures, aesthetic fillings, crowns, bridges, and preventive dental care, along with advanced cosmetic enhancements such as laser bleaching and smile correction. Her meticulous technique and commitment to sterility ensure that every procedure meets the highest clinical standards. Patients appreciate her gentle demeanour, clear communication, and unwavering focus on long-term oral health outcomes, qualities that make her one of the most trusted dental specialists in Yelahanka. At Manipal Hospital Yelahanka, Dr. Asifa Khanum continues to provide holistic dental care in a state-of-the-art environment, supported by modern technology and an integrated, multidisciplinary medical setup. She strongly believes that oral health plays a vital role in overall wellbeing and advocates for preventive and minimally invasive treatments whenever possible. Her practice emphasises conservative dentistry — preserving natural tooth structure while achieving optimal functionality and aesthetics. She is particularly adept at managing endodontic retreatments, post-endodontic restorations, and the full range of restorative dental procedures that restore both structure and confidence in her patients' smiles. Her vast clinical experience also includes prosthetic dentistry, such as the fabrication of fixed and removable partial dentures, full-mouth rehabilitations, and minor oral surgical procedures. She is skilled in handling complex cases with underlying periodontal and structural challenges, providing a seamless experience from diagnosis to rehabilitation. In addition, her familiarity with laser-assisted techniques, atraumatic restorative therapy (ART), and preventive fluoride applications allows her to deliver pain-free, modern dental care suited to individual patient needs. Through her work at Manipal Hospital Yelahanka, she continues to uphold the highest standards of dental care, offering patients safe, ethical, and comprehensive treatment in a supportive environment. Her strong

commitment to patient education, preventive strategies, and clinical excellence has rightfully positioned her among the best dentists in Yelahanka, trusted by countless patients for her skill and sincerity.
