

DR. AARTHI N

Consultant - Paediatrics Hematology, Oncology & Bone Marrow Transplantation

Qualification

MBBS | MD Paediatrics | PGIMER | DM Paediatric Oncology

Overview

Dr. Aarthi N is a highly skilled paediatric oncologist in Yelahanka. She is currently practising as a Consultant – Paediatrics Haematology, Oncology & Bone Marrow Transplantation at Manipal Hospital Yelahanka, Bangalore, bringing comprehensive expertise in childhood cancers, haematological disorders, and advanced bone marrow transplantation. Known for her compassionate, evidence-based, and precision-driven approach, she has become a trusted name among families seeking specialised care for children with complex oncological and haematological conditions. Her dedication to paediatric oncology and bone marrow transplantation, coupled with a strong academic and clinical foundation, has earned her recognition as one of the best paediatric oncologists in Yelahanka, sought after for her meticulous care, holistic treatment planning, and family-centric support. With an impressive academic background, Dr. Aarthi completed her MBBS from Stanley Medical College, Chennai, followed by MD Paediatrics from the prestigious PGIMER, Chandigarh, where she was honoured as the Best Outgoing Student. She further pursued DM in Paediatrics Oncology from the renowned Kidwai Memorial Institute of Oncology, Bengaluru.

Her specialised training in Bone Marrow Transplantation (BMT) at Apollo Hospitals, Chennai, along with an international certification course in Cancer Genetics accredited by GENE Council, Australia, reflects her deep commitment to advanced, personalised, and technology-driven paediatrics oncology care. At Manipal Hospital Yelahanka, she plays a pivotal role in the diagnosis and management of haematological malignancies such as leukaemia and lymphoma, solid tumours including neuroblastoma, Wilms' tumour, retinoblastoma, osteosarcoma, and paediatric brain tumours, especially those requiring multidisciplinary neuro-oncology intervention. She is particularly known for her expertise in handling complex cases like bone marrow failure syndromes, aplastic anaemia, and indications requiring bone marrow transplantation. Her deep understanding of cancer genetics allows her to design highly individualised treatment protocols, enhancing treatment precision and improving long-term outcomes. As one of the best paediatric haematologists and oncologists in Yelahanka, Dr. Aarthi emphasises early detection, precision diagnostics, multidisciplinary intervention, and comprehensive family support. She believes that paediatric cancer care is not just about treating the disease but also about nurturing emotional resilience, supporting families, and ensuring long-term quality of life. Her counselling-based approach helps children and parents understand treatment options clearly, helping reduce fear, anxiety, and treatment-related distress. She ensures that every child undergoing cancer treatment receives holistic care—including nutrition optimisation, infection prevention, rehabilitation support, hormonal management, psychosocial guidance, and survivorship planning. She is also deeply involved in community oncology awareness programmes, early cancer detection campaigns, and family education initiatives. She regularly participates as an invited faculty at national and international forums such as PHOCON and ISNOCON, contributing to training, protocol development, and ongoing clinical research. With more than fifteen national publications, she continues to contribute significantly

to paediatric oncology literature and advancements in BMT, paediatric solid tumour therapy, and neuro-oncology. Beyond her clinical and academic achievements, Dr. Aarthi is known for her empathy, strong communication skills, and unwavering commitment to her patients and their families. Parents value her for her ability to communicate complex medical information in a reassuring and relatable manner, while children respond positively to her calm and encouraging presence. Her vision is to build strong, child-centred paediatric oncology systems that integrate clinical excellence, emotional care, family counselling, and survivorship. At Manipal Hospital Yelahanka, she leads with the belief that every child deserves not just treatment, but a real opportunity for recovery, growth, and thriving beyond illness. Her commitment to paediatric oncology continues to make a profound impact on patients, families, and the healthcare community, reinforcing her reputation as one of the best paediatric oncologists in Yelahanka, dedicated to transforming cancer care for children through compassion, science, and hope.
