

DR. SHREYAS UMESH AKKI

Consultant – Nephrology & Transplant Physician

Qualification

MBBS | MD in General Medicine | DrNB in Nephrology

Overview

Dr. Shreyas Umesh Akki is a methodical and clinically focused nephrologist in Yeshwanthpur with specialised expertise in kidney disease management and transplant medicine. He is currently practising as a Consultant – Nephrology & Transplant Physician at Manipal Hospital Yeshwanthpur, bringing over 4 years of clinical experience in internal medicine and nephrology training, with advanced super-speciality exposure in renal care. With qualifications including MBBS, MD in General Medicine, and DrNB in Nephrology. Dr. Shreyas Akki has developed a strong clinical foundation in managing complex medical conditions, particularly those affecting renal function. His academic training is complemented by additional certification in the evidence-based management of diabetes mellitus, reflecting his understanding of metabolic disorders that significantly impact kidney health. His clinical practice focuses on the evaluation and management of chronic kidney disease (CKD), acute kidney injury (AKI), electrolyte imbalances, hypertension-related renal disorders, and diabetic kidney disease. He adopts a structured approach involving detailed clinical assessment, laboratory interpretation, and personalised treatment

planning to optimise patient outcomes. His expertise in these areas contributes to his recognition as one of the best nephrologists in Yeshwanthpur for comprehensive kidney care. In addition to clinical practice, he has contributed to academic research and scientific presentations. His work includes a publication in the Journal of the Association of Physicians of India (JAPI) on lipid profiles, as well as presentations at national and international platforms such as APICON and the World Congress of Nephrology (WCN 2025). His achievements include recognition as a finalist in the Torrent Young Scholar Award (Nephrology) and the TAC Summit (All India level), reflecting his engagement with evolving nephrology research. Dr. Shreyas Akki is also actively involved in renal transplant medicine, including pre-transplant evaluation, donor-recipient matching considerations, and post-transplant monitoring. His academic work on tacrolimus pharmacogenetics in transplant recipients highlights his interest in improving transplant outcomes through personalised medicine. This focus on transplant nephrology further positions him among the best nephrologists in Yeshwanthpur for advanced renal care and transplant support. His clinical training includes experience in managing patients with complex comorbidities, integrating internal medicine principles with nephrology-specific care. He is skilled in interpreting diagnostic parameters relevant to renal function and guiding patients through long-term disease management, dialysis planning, and transplant-related pathways.
