

DR. SHYAM SUNDAR B

Consultant – Nephrology & Transplant Physician

Qualification

MBBS | MD (Medicine) | DNB (Nephrology)

Overview

Dr. Shyam Sundar B is a distinguished and clinically adept nephrologist in Yeshwanthpur with specialised expertise in renal medicine and transplant care. He is currently practising as a Consultant – Nephrology & Transplant Physician at Manipal Hospital Yeshwanthpur, Bangalore, bringing over 10 years of focused experience in nephrology to the management of complex kidney disorders and transplant medicine. He completed his MBBS from Vinayaka Missions Medical College (Pondicherry University), followed by an MD in General Medicine from Government Mohan Kumaramangalam Medical College, Salem, and further pursued DNB in Nephrology at Manipal Hospital, Bangalore. This strong academic foundation, combined with extensive clinical exposure, has shaped his approach to comprehensive kidney care, spanning diagnosis, long-term disease management, and advanced renal interventions. Dr. Shyam Sundar's clinical practice encompasses the full spectrum of nephrology, including acute and chronic kidney diseases, electrolyte imbalances, hypertension-related renal disorders, and transplant evaluation. He is experienced in managing patients requiring both short-term and long-term renal support, ensuring that

care plans are tailored to the patient's clinical status and long-term outcomes. His structured and evidence-based approach contributes to his standing as one of the best nephrologists in Yeshwanthpur for comprehensive kidney care. A key focus of his expertise lies in renal transplantation, where he is skilled in evaluating and managing both standard and high-risk transplant cases. His experience includes ABO-incompatible kidney transplants, requiring careful immunological assessment and meticulous peri-transplant planning. He is closely involved in the continuum of transplant care, from pre-transplant workup and donor-recipient matching to post-transplant monitoring, ensuring graft function optimisation and complication prevention. His expertise in this domain further reinforces his recognition as one of the best nephrologists in Yeshwanthpur for advanced transplant care. Dr. Shyam Sundar is also proficient in all major dialysis modalities, including haemodialysis and peritoneal dialysis, enabling him to guide patients through appropriate renal replacement therapies based on clinical need and lifestyle considerations. His procedural expertise includes performing renal biopsies, which are critical in diagnosing complex kidney conditions and guiding targeted treatment strategies. His clinical approach is methodical and patient-focused, emphasising early detection, accurate diagnosis, and long-term disease control. He integrates laboratory findings, imaging, and clinical evaluation to develop precise treatment pathways, ensuring that patients receive clarity and confidence in their care journey. His ability to manage both routine and high-acuity nephrology cases within a hospital setting reflects strong clinical judgment and procedural competence.

Field of Expertise

- Renal Transplant – High-Risk Transplant & ABO-Incompatible Transplant
- All forms of Dialysis - Hemodialysis, Peritoneal Dialysis
- Interventional Nephrology - Percutaneous Renal Biopsy
